Cubas Sugar Industry:

Cuban Cane Sugar-a Sketch of the Industry Robert Wiles,1916 *Reinventing the Cuban Sugar Agroindustry* Jorge F. Pérez-López,Jose Alvarez,2005-01-01 The demise of the international socialist community led to a loss in preferential markets for Cuban sugar industry In response to the current crisis this volume gathers over a dozen recognized world experts on Cuban agroindustry to analyze specific topics and make recommendations that would reinvent the industry for effective transition to a free market environment **The Economics of Cuban Sugar** Jorge Pérez-López,2010-11-23 Sugar the backbone of the Cuban economic life for centuries continues to dominate the economy of socialist Cuba After initial attempts at diversification following the Revolution the Cuban regime rehabilitated the sugar industry in 1965 making the country again vulnerable to swings in world market prices and the dangers of overdependence on a single agricultural product Perez L pez examines the various efforts at economic planning in the years following the Revolution and provides in depth analysis of aspects particular to the sugar industry cultivation mechanization energy and transportation refining and the manufacture of sugar derivatives production costs and foreign trade Cuban Sugar in the Age of Mass Production Alan Dye,1998 This book examines the modernization of the Cuban sugar industry from the end of the Cuban War of Independence throughout the ensuing boom in the sugar industry An underlying theme of the book is the close connection between the technical and organizational changes in the Cuban sugar industry and the technological changes behind the managerial revolution in industrial countries The technical changes in the sugar industry marked by the diffusion of mass production technologies and the adoption in Cuba of modern central factories were characteristic of most progressive industries of that time In general the application of mass production technologies heralded the transition from proprietorships to modern hierarchical and corporate forms of business organization This book links the development in the Cuban sugar industry to the global movement in business organization and technology that has been referred to as the rise of managerial capitalism The first three decades of the twentieth century have been recognized as critical in Cuba s history because the economic foundations including the rise of sugar latifundismo were laid for the Cuban revolution Most of the existing literature has focused on the social impact of the profound socio economic and institutional changes that came with the massive entrance of capital from North America The line of investigation in this book is unique in that it examines the economic factors that underlay these socio economic and institutional changes What have frequently been seen as the effects of political intervention or imperialism the author identifies as economic outcomes caused by mass production technology This is the firstbook to apply the tools of the new economic history to Cuba complementing traditional historical methods with rigorous use of economic theory transaction cost economics and quantitative methods to arrive at its conclusions *Cuban Sugar Industry* J. Curry-Machado,2011-05-09 Nineteenth century Cuba led the world in sugar manufacture and technological innovation was central to this Through the story of a group of forgotten migrant workers who anonymously contributed to Cuba s

development this book explores the development of the Cuban sugar industry and how the country became bound into global networks The Truth about Sugar in Cuba Antonio Barro y Segura, 1943 The Cuban Sugar Industry in the Twentieth Century, 1898-1932 Ann Leonharda Blix, 1935 *Cuba's Sugar Industry* Jose Alvarez, Lazaro Peña Castellanos, 2001

Following forty years of tension between Cuba and the United States this study of Cuba's agro industry presents the results of a remarkable collaboration between researchers living in the two countries The authors consider the prospects for the sugar industry offering scenarios of a smaller more efficient role in the economy and examine reforms of the early 1990s

Black Labor, White Sugar Philip A. Howard, 2015-06-15 Early in the twentieth century the Cuban sugarcane industry faced a labor crisis when Cuban and European workers balked at the inhumane conditions they endured in the cane fields Rather than reforming their practices sugar companies gained permission from the Cuban government to import thousands of black workers from other Caribbean colonies primarily Haiti and Jamaica *Black Labor White Sugar* illuminates the story of these immigrants their exploitation by the sugarcane companies and the strategies they used to fight back Philip A Howard traces the socioeconomic and political circumstances in Haiti and Jamaica that led men to leave their homelands to cut load and haul sugarcane in Cuba Once there the field workers or braceros were subject to marginalization and even violence from the sugar companies which used structures of race ethnicity color and class to subjugate these laborers Howard argues that braceros drew on their cultural identities from concepts of home and family to spiritual worldviews to interpret and contest their experiences in Cuba They also fought against their exploitation in more overt ways As labor conditions worsened in response to falling sugar prices the principles of anarcho syndicalism converged with the Pan African philosophy of Marcus Garvey to foster the evolution of a protest culture among black Caribbean laborers By the mid 1920s this identity encouraged many braceros to participate in strikes that sought to improve wages as well as living and working conditions The first full length exploration of Haitian and Jamaican workers in the Cuban sugarcane industry *Black Labor White Sugar* examines the industry's abuse of thousands of black Caribbean immigrants and the braceros answering struggle for power and self definition The Place of the Cuban Sugar Industry in the Trade Relations Between Cuba and the United States Mario Lazo (Jr.), 1952

Cuban Sugar Policy from 1963 to 1970 Heinrich Brunner, 2010-11-23 In 1963 Cuba launched a program to develop its economy by expanding its sugar production and export trade Cuban economists believed that through intensive development of this leading sector they could generate capital to invest in manufacturing and thus move away from a one crop economy After providing background information on Cuba's prerevolutionary economy Brunner explores the effects of Communist ideology and the U S embargo on the country's resources and trade and analyzes the problems Cuba faced in shifting from trade with the U S to trade with the Soviet Union and Soviet bloc He evaluates their implementation of the development plan assessing the sugar industry within Cuba as well as how its accelerated development affected the rest of the domestic economy Cuban Sugar Industry at a Glance, 1982 Latin America's Big Three Sugar Producers in

Transition Peter J. Buzzanell, 1992 Major government policy turning points for Latin America's three largest sugar producers Cuba Mexico and Brazil could significantly affect U S and world sugar trade The breakup of the socialist trading bloc has reduced Cuba's ability to purchase inputs needed for sugar production while forcing it to look for new markets Privatization of the sugar industry in Mexico has revitalized its production efficiency and freedom to trade in the private market These potential gains must be measured against rapidly growing domestic consumption which has bumped Mexico from a net sugar exporter to a net sugar importer in recent years Brazil meanwhile continues to balance domestic needs especially sugar derived ethanol fuel for its autos against export earnings Brazil unlike Cuba and Mexico has enough refineries to satisfy a large share of world demand for refined sugar

History & Present Status of the Cuban Sugar Industry O. S. Nelson, **Inspection of Cuban Agriculture and Sugar Industry** United States. Congress. House. Committee on Agriculture, 1954 *Sugar in Cuba* Tony King Yang, 2005 **Sugar Production in Northeastern Brazil and Cuba, 1858-1908** David Denslow, 1987 *The Sugar Industry of Cuba* George W. Schlesselman, 1928 *Sugar and Society in the Caribbean* Ramiro Guerra, 1964 Social theory on adverse social implications of large sugar cane plantations based on forced labour of plantation workers with wages kept artificially low Economic implications of large land ownership accompanied by rural area poverty as experienced by Cuba and other Caribbean countries Some references as footnotes Four Views on the Sugar Industry of Cuba Oscar Seigle, 1955
