Hayden,1951 **Wordsworth's Second Nature** James Chandler,1984-12-15 Wordsworth is England's greatest poet of the French Revolution he witnessed some of its events first hand participated in its intellectual and social ambitions and eventually developed his celebrated poetic campaign in response to its enthusiasms But how should that response be understood Combining careful interpretive analysis with wide ranging historical scholarship Chandler presents a challenging

new account of the political views implicit in Wordsworth's major works in *The Prelude* above all but also in the central lyrics and shorter narrative poems Central to the discussion which restores Wordsworth to both the French and English contexts in which he matured is a consideration of his relation to Rousseau and Burke Chandler maintains that by the time Wordsworth set forth his program for poetry in 1798 he had turned away from the Rousseauist idea of nature that had informed his early republican writings He had already become a poet of what Burke called second nature human nature cultivated by custom habit and tradition and an opponent of the quest for first principles that his friend Coleridge could not forsake In his analysis of the poetry Chandler suggests that even Wordsworth's most apparently private moments the lyrical spots of time ideologically embodied the uncalculated habits of an oral narrative discipline and a native English mind The Mind of a Poet: A study of Wordsworth's thought Raymond Dexter Havens, 1967
