A Tempting Shore:

A Tempting Shore Dana James,2007 After her grandmother s death Elodie found herself faced with the task of saving her home Her opponent was the charismatic property developer Neil Munroe but Elodie was determined not to give in to his demands without a fight But when her strategy to keep him at arms length went wrong she soon found that Neil wanted far more than just her cottage

Secret Beaches of Southern Vancouver Island Theo Dombrowski,2011-09-30 This is your guide to dozens of spectacular and often hidden beaches on the eastern coast of Vancouver Island between Qualicum and the Malahat While some of them are well used by people living nearby many are virtually impossible to find without combing through official maps and back road guides From tiny rocky coves to broad sandy beaches these public access spots are enormously diverse Just as important as finding these spots is knowing what to expect Thus each location is accompanied by detailed information that any beach explorer should know before setting out Is the beach a few level steps from a vehicle or down a high steep bank Is the beach suitable for children Large groups Kayakers All of these questions and many more are answered in this book which includes Theo s hand drawn maps photographs and artwork Watch sea lions in the winter Higginson Road Paint one of the few great views of Mt Arrowsmith go before noon for dramatic light Rowland Road Head to the most child friendly beach between Crofton and the Malahat Cherry Point Nature Park Splash and swim in warm water over sand Benwalden Road Refresh your pleasure in the shore and head out to picnic play launch kayaks watch winter storms or just enjoy the waves

Rocky Shores John Archer-Thomson,Julian Cremona,2019-02-21 An engaging account of the natural history of rock and boulder strewn shores around Britain s coastline Rocky Shores explores the species communities and landscape of the narrow strip of land surrounding much of the British Isles While it may be limited in extent this habitat is incredibly biodiverse and this insightful book details all the patterns of marine life that might be encountered on sheltered and exposed shores from the inhospitable splash zone to the repeatedly submerged lower shore and everything in between Comprehensive chapters accompanied by exceptional photographs cover various members of the rocky shore community in turn striking lichens that colourfully adorn the rocks seaweeds that have sustained human settlements for millennia mysterious and often spectacular worms and their relatives molluscs with variously configured shells spiny skinned echinoderms that move using tube feet arthropods that range from tiny marine insects to heavy clawed crabs and microscopic species that drift around at the mercy of the tides Rock pools provide pockets of diversity dotted across the shore while the strandline at the high tide mark supports a unique assemblage of microbes and invertebrates that attracts a variety of birds and mammals For anyone with a love of the shore from the occasional rockpooter to avid naturalists this book is a must for your collection

Shores of the Polar Sea Edward L. Moss,2024-11-23 HE ARCTIC EXPEDITION of 1875 left England on

29th May crossed the Atlantic to Davis Straits in a succession of storms and entered the Arctic regions on 4th July It sailed with orders to attain the highest northern latitude and if possible reach the Pole In old times when voyages were longer than in these days of steam a nautical frolic on crossing the Line helped to break the monotony of many a tedious passage This time honoured custom is slowly becoming a thing of the past When it is gone there will be little in sea or sky to make crossing the Equator in any way remarkable The Tropic Zones are no better defined and one can sail into or out of them without experiencing a single impressive sensation But the Arctic Circle has obvious boundaries A conspicuous change in the ordinary habits of nature warns the traveller that he is leaving the hospitable realms of earth behind him and entering a region full of new experiences Here familiar light and darkness cease to alternate morning and evening no longer make the day and in proportion as the latitude increases day and night become mere figures of speech While our two ships steamed northward along the west shores of Greenland the novel charm of constant daylight was felt by every one We all had our own ideas of what Arctic summer would be like but ideas drawn from books rarely remain unchanged when brought face to face with reality Although the passage into perpetual day was of course gradual yet it was quite rapid enough to upset all regular habits Most of us observed sadly irregular hours but one energetic fellow voyager bent on making the most of his opportunities stopped up for three days at a stretch Our squadron consisted of H M SS Alert Discovery and Valorous the latter vessel accompanying the Expedition as far as Disco for the purpose of helping it so far northwards with its heavy stock of three years provisions and fuel On entering Davis Straits no one of the ships had the least idea where the others were They had been separated in a cyclone on 13th June and had crossed the Atlantic independently Fortunately however all three turned up almost simultaneously off the west coast of Greenland Four days before crossing the Arctic Circle the Alert and Discovery met under the rugged coast near Godhaab As the ships approached each anxiously scanned the other to see what damage had been done by the Atlantic storms Boats soon passed from ship to ship and it was amusing to note how both men and officers of either ship the writer included already placed the firmest faith in their own vessel and underrated the seaworthiness of her consort It was positively quite disappointing to find that the Discovery's spars were all right and that she like ourselves had lost but one boat Of course we congratulated each other on our good fortune and good fortune it was for our light beautifully built boats could not be replaced and few ships heavily laden both below and on deck as ours were would have passed through such weather without more serious loss
