Age Of Wire And String Stories:

The Age of Wire and String Ben Marcus, 2024-10-22 In *The Age of Wire and String* hailed by Robert Coover as the most audacious literary debut in decades Ben Marcus weilds together a new reality from the scrapheap of the past Dogs birds horses automobiles and the weather are some of the recycled elements in Marcus s first collection part fiction part handbook as familiar objects take on markedly unfamiliar meanings Gradually this makeshift world in its defiance of the laws of physics and language finds a foundation in its own implausibility as Marcus produces new feelings and sensations both comic and disturbing in the definitive guide to an unpredictable yet exhilarating plane of existence

[Dear Incomprehension](#) Stéphane Vanderhaeghe, 2024-03-12 This book tackles a broad swath of contemporary literature currently labeled speculative fiction A blurring of genres that includes science fiction modern fairy tales and avant garde experimental fiction these works are extremely popular but also derive from highly sophisticated philosophical and aesthetic sensibilities ones that call into question and uproot the very foundations of stories and storytelling Because such fictions subvert most conventional narrative devices plot recognizable characters verisimilitude logic legibility they deliberately confound almost any kind of conventional reading and criticism To do such a literature justice the traditional frameworks of literary criticism fail and *Dear Incomprehension* is more of an extended philosophical essay than it is a traditional work of criticism as oblique and unconventional in its voice tone and methods as the texts it illuminates

Landscape as Territory Clara Olóriz, 2020-01-28 *Landscape as Territory* is a cartographic book project that critically addresses the agency of architects in the so-called Urban Age, understanding the notion of territory as a field of design praxis through which interconnected landscapes are produced. Territory understood as a political technology has the capacity to involve architects and designers into complex social, political, technical, legal, strategic and economic processes that are both historical and geographical engines of contemporary urbanization. *Islands in Northern Norway: Territorial praxis is interrogated* in a collection of threaded theory and design contributions where essays pose key questions that are addressed through projective cartographies, unfolding arguments related to three sections: 1. territory, 2. critical cartographies and 3. agency.
