## **Cruel Victim:**

*Cruelty* Kathleen Eleanor Taylor, 2009 In this thoughtful exploration of a painful subject Kathleen Taylor seeks to bring together the fruits of work in psychology sociology and her own field of neuroscience to shed light on the nature of cruelty and what makes human beings cruel The question of cruelty is inevitably tied to questions of moral philosophy the nature of evil free will and responsibility Taylor s approach is ambitious but little work has been done in this area and this wide ranging discussion considering the roles of emotion belief identity and otherizing evolved instincts and differences in brains callousness and sadism seeks to begin to identify how we might reduce or limit cruelty in our societies by a greater understanding of its causes and the circumstances in which it can grow As with her highly regarded previous book *Brainwashing* Taylor draws in examples from history and literature in her study making this a rich and multifaceted analysis that should be of interest to a wide readership and provoke much thought debate and further research Character, Virtue Theories, and the Vices Christine McKinnon, 1999-08-26 This book argues that the question posed by virtue theories namely what kind of person should I be provides a more promising approach to moral questions than do either deontological or consequentialist moral theories where the concern is with what actions are morally required or permissible It does so both by arguing that there are firmer theoretical foundations for virtue theories and by persuasively suggesting the superiority of virtue theories over deontological and consequentialist theories on the question of explaining morally bad behavior Virtue theories can give a richer account by appealing to the kinds of dispositions that make certain bad choices appear attractive This richer account also exposes a further advantage of virtue theories they provide the best kinds of motivations for agents to become better persons **Encountering Cruelty: The Fracture of the Human Heart** Michael R. Trice, 2011-04-21 Interest in recent years in reconciliation and conflict transformation has witnessed a great deal of attention to building a future through forgiveness and preventative measures in order to impede egregious wrongdoing This effort for a reconciled future is absent reflection on the nature of cruelty Cruelty has always been apparent in massive acts of wrongdoing and yet is repeatedly concealed in our assessment of the acts themselves This book is a theologically honest and deep structure exploration of cruelty in its personal communal and institutional encounters in human life Drawing on Nietzsche s challenge of cruelty to the western tradition the work offers a comprehensive study of how cruelty undermines care trust respect and justice all those elements of human reciprocity that mark our lives as interdependent beings The work concludes with a tightly written Epilogue on interpreting the theological meaning and accessibility of reconciliation today **Gender Competent Public Law and Policies** Marko Davinić, Svetislav Kostić, 2023-01-18 This book offers a new perspective on public law and public policies The collection of papers gathered here begins with an in depth discussion on gender perspectives in constitutional law which can support gender justice but also perpetuate patriarchal norms The book then analyzes the role of the European Ombudsman in the area of gender discrimination Despite its limited jurisdiction this

institution has become a significant complementary tool in the protection of gender equality and the elimination of gender discrimination at the EU level Particular attention is paid to the importance of mainstreaming gender into public policies Thus the legal and institutional frameworks of Spain and Serbia are presented which can serve as an inspiration to other countries Another important aspect covered in the book is an analysis of systemic differences between the average wages of women and men in the six countries of the Western Balkans In turn the book presents a discussion on female genital mutilation as a highly gendered crime based on extreme versions of rigid patriarchal ethnic and religious norms and customs It is analyzed through the lenses of the Istanbul Convention as a tool for combating violence against women Particular attention is paid to femicide its definitions forms and phenomenological characteristics Having been only recently acknowledged femicide is still characterized by an inadequate judicial response in many countries In this regard a special focus is on German and Serbian experiences in acknowledging femicide and combating it through various measures Finally the importance of stalking laws is discussed as stalking is a highly gendered crime that many states fail to combat adequately The collection of essays offered in this book will be of interest to all those working in the field of public law to policymakers and to students and academics looking to broaden and deepen their research on various issues in public law and policies from gender perspectives
