*Class in Contemporary China* David S. G. Goodman, 2014-10-13 Choice Outstanding Academic Title for 2015 More than three decades of economic growth have led to significant social change in the Peoples Republic of China This timely book examines the emerging structures of class and social stratification how they are interpreted and managed by the Chinese Communist Party and how they are understood and lived by people themselves David Goodman details the emergence of a dominant class based on political power and wealth that has emerged from the institutions of the Party state a well established middle class that is closely associated with the Party state and a not so well established entrepreneurial middle class and several different subordinate classes in both the rural and urban areas In doing so he considers several critical issues the extent to which the social basis of the Chinese political system has changed and the likely consequences the impact of change on the old working class that was the socio political mainstay of state socialism before the 1980s the extent to which the migrant workers on whom much of the economic power of the PRC since the early 1980s has been based are becoming a new working class and the consequences of Chinas growing middle class especially for politics The result is an invaluable guide for students and non specialists interested in the contours of ongoing social change in China

was supported by a grant from the Joint Committee on Contemporary China of the Social Science Research Council and the American Council of Learned Societies using funds provided by the Andrew Mellon Foundation Its principal goal was to use detailed case studies to explore the relevance of interest group approaches to the study of Chinese politics The second a panel organized by the editor for the 1978 Chicago meeting of the Association of Asian Studies sought to apply participatory approaches to the role of social groups in the Chinese political process The striking degree of overlap in the focus methodology and participants in both meetings suggested to a number of the paper writers that there was a need for a more eclectic approach which would focus simultaneously on individual and group actors The recognition that a volume based on such an approach might serve the needs of students and scholars seeking to examine the dynamics of informal influence and power in China was the stimulus for publishing the studies presented here in book form ix
