When multiple forces act on an object, they combine to produce a net force, which determines whether the object speeds up, slows down, or changes direction. Understanding how forces and acceleration combine provides a powerful predictive tool for a wide range of scientific and engineering applications.</p> <p>Newton's second law of motion states that the acceleration of an object is directly proportional to the net force acting on it and inversely proportional to its mass. This relationship is expressed by the equation $F = ma$, where F is the net force, m is the mass, and a is the acceleration. This equation is a powerful tool for predicting the motion of objects under different force conditions.</p> <p>Newton's third law of motion states that for every action, there is an equal and opposite reaction. This means that if one object exerts a force on another object, the second object exerts a force of the same magnitude but in the opposite direction on the first object. This principle is fundamental to understanding the forces that govern the motion of objects in the universe.</p> </div> <p>Answer the questions that follow.</p> <ol style="list-style-type: none"> Which of the following is not a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force Which of the following is not a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force Which of the following is not a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force Which of the following is not a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force Which of the following is not a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force Which of the following is not a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force Which of the following is not a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force Which of the following is not a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force Which of the following is not a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force Which of the following is not a type of force? <ol style="list-style-type: none"> Gravitational force Electromagnetic force Frictional force Centrifugal force
