Bees And Honey:

Letters from the Hive Stephen Buchmann, Banning Repplier, 2006-05-30 They work hard are devoted to family love sex and know the importance of a good piece of real estate Honey bees and the daily workings of their close knit colonies are one of nature s great miracles And they produce one of nature s greatest edible bounties honey More than just a palate pleaser honey was once an offering to the gods a preservative and a medicine whose sought after curative powers were detailed in ancient texts and are being rediscovered by modern medical science In *Letters from the Hive* Prof Stephen Buchmann takes us into the hive nursery honey factory queen s inner sanctum and out to the world of backyard gardens open fields and deserts in full bloom where the age old sexual dance between flowers and bees makes life on earth as we know it possible Hailed for their hard work harmonious society and mistakenly for their celibacy bees have a link to our species that goes beyond biology In *Letters from the Hive* Buchmann explores the fascinating role of bees in human culture and mythology following the honey hunters of native cultures in Malaysia the Himalayas and the Australian Outback as they risk life and limb to locate a treasure as valuable as any gold To contemplate a world without bees is to imagine a desolate place culturally and biologically and Buchmann shows how with each acre of land sacrificed to plow parking lot or shopping mall we inch closer to what could become a chilling reality He also offers honey based recipes cooking tips and home remedies further evidence of the gifts these creatures have bestowed on us Told with wit wisdom and affection and rich with anecdote and science *Letters from the Hive* is nature writing at its best This is natural history to be treasured a sweet tribute that buzzes with life

Pot-Honey Patricia Vit, Silvia R. M. Pedro, David Roubik, 2013-01-17 The stingless bees are one of the most diverse attractive fascinating conspicuous and useful of all the insect groups of the tropical world This is a formidable and contentious claim but I believe it can be backed up They are fifty times more species rich than the honey bees the other tribe of highly eusocial bees They are ubiquitous in the tropics and thrive in tropical cities In rural areas they nest in a diversity of sites and are found on the flowers of a broad diversity of crop plants Their role in natural systems is barely studied but they almost certainly deserve that hallowed title of keystone species They are popular with the general public and are greatly appreciated in zoos and gardens The chapters of this book provide abundant further evidence of the ecological and economic importance of stingless bees

Honey Bee Alchemy. A Contemporary Look at the Mysterious World of Bees, Hive Products and Health Valery A Isidorov, 2021-03-29. The book offered to the reader's attention is the author's translation of a book published in Poland in 2013. The book is addressed to the lovers of wildlife and honey bees and to everyone interested in beekeeping products, their composition and medicinal properties. For Western European and American readers, Chapters 4 and 7, containing information about practically unknown in the West unconventional but very valuable beekeeping products, may be of particular interest. The author's scientific interests extend not only to the chemical composition and the origin of propolis, honey and other bee products but also to the bee health. Unfortunately, in recent decades, the bee health has noticeably deteriorated, resulting in many difficulties in beekeeping. The last Chapter of the book is devoted to the bee health and possible ways of their treatment, avoiding synthetic drugs with their unwanted side effects. The author's work in recent years is connected with these problems, and it is no coincidence that the chapter devoted to the bee health has turned out to be the most revised and extended in comparison to the Polish edition. In preparing this publication, photographs were used kindly provided to me by the Polish beekeeper Mrs. Teresa Porankiewicz Bartkowiak, to whom I express my sincere gratitude.
