Before Copyright Elizabeth Armstrong,1990 **The Making of Intellectual Property Law in Vietnam** Tran Kien,2025-09-03 This book is about the making of intellectual property law in Vietnam across colonial and socialist space and time from 1864 to 1994 It provides a completely new provoking narrative disproving previously published scholarship which claimed that there was no intellectual property law in Vietnam during the colonial and socialist periods In doing so the book engages with an emerging field of historiographical inquiry into the intellectual property law history in Vietnam and worldwide which investigates how and why the scholarship about the history of intellectual property law has been construed and framed as such within a specific period and space This book is comprised of three knowledge components The first involves the reconstruction of the lost intellectual property law from 1864 to 1994 in Vietnam doctrinally Relying on newly discovered archives in Vietnam and worldwide it unravels a corpus of statutory and regulatory provisions and interesting at times contradictory juridical decisions that governed and interpreted copyright patent and trademark The second is the historiographical inquiry of the making of the intellectual property law history scholarship in Vietnam This will answer the questions of how and why the particular histories had been construed and framed as such at a particular time This involves the debate about sociopolitical ideologies underlying the meaning and application of the laws most notably colonialism and socialism Finally the third engages with the theory of legal transplantation It addresses a hypothetical question of colonial laboratory as a form of legal transplantation a new concept that this book offers to the global scholarship It demonstrates that the colonial empire had tried to use Vietnam as a laboratory for its legal reform and then transplanted the successful and feasible results back to the empire This book explains the distinctively ideological principles underlying the understanding and application of the law **Forgotten Intellectual Property Lore** Shubha Ghosh,2020-10-30 This innovative book explores forgotten disputes over intellectual property and the ways in which creative people and sovereigns have managed these disputes throughout the centuries With a focus on reform it raises important questions about the resilience of legal rules and challenges the methodology behind traditional legal analyses Focusing on lore and traditions expert contributors incorporate contextual understandings that are rooted in history sociology political science and literary studies into their analyses **Research Handbook on the History of Copyright Law** Isabella Alexander,H. Tomás Gómez-Arostegui,2016-03-25 There has been an explosion of interest in recent years regarding the origin and of intellectual property law The study of copyright history in particular has grown remarkably in the last twenty years with a flurry of activity in the last ten Crucial to this activity has been a burgeoning focus on unpublished primary sources enabling new and stimulating insights This Handbook takes stock of the field of copyright history as it stands today as well as examining potential developments in the future **The Oxford Handbook of Intellectual Property Law** Rochelle C. Dreyfuss,Justine Pila,2018-04-12 We live in an age in which expressive informational and technological subject matter are becoming

increasingly important Intellectual property is the primary means by which the law seeks to regulate such subject matter It aims to promote innovation and creativity and in doing so to support solutions to global environmental and health problems as well as freedom of expression and democracy It also seeks to stimulate economic growth and competition accounting for its centrality to EU Internal Market and international trade and development policies Additionally it is of enormous and increasing importance to business As a result there is a substantial and ever growing interest in intellectual property law across all spheres of industry and social policy including an interest in its legal principles its social and normative foundations and its place and operation in the political economy This handbook written by leading academics and practitioners from the field of intellectual property law and suitable for both a specialist legal readership and an intelligent but non specialist legal and non legal readership provides a comprehensive account of the following areas The foundations of IP law including its emergence and development in different jurisdictions and regions The substantive rules and principles of IP and Important issues arising from the existence and operation of IP in the political economy

Pierre de L'Estoile and His World in the Wars of Religion Tom Hamilton, 2017 The Wars of Religion embroiled France in decades of faction violence and peacemaking in the late sixteenth century When historians interpret these events they inevitably depend on sources of information gathered by contemporaries none more valuable than the diaries and collection of Pierre de L'Estoile 1546-1611 who lived through the civil wars in Paris and shaped how they have been remembered ever since Taking him out of the footnotes and demonstrating his significance in the culture of the late Renaissance this is the first life of L'Estoile in any language It examines how he negotiated and commemorated the conflicts that divided France as he assembled an extraordinary collection of the relics of the troubles a collection that he called the storehouse of my curiosities The story of his life and times is the history of the civil wars in the making Focusing on a crucial individual for understanding Reformation Europe this study challenges historians assumptions about the widespread impact of confessional conflict in the sixteenth century L'Estoile's prudent non confessional responses to the events he lived through and recorded were common among his milieu of Gallican Catholics His life writing and engagement with contemporary news books and pictures reveals how individuals used different genres and media to destabilize rather than fix confessional identities Bringing together the great variety of topics in society and culture that attracted L'Estoile's curiosity this volume rethinks his world in the Wars of Religion

Charting Change in France Around 1540 Marian Rothstein, 2006 During the decade or so surrounding 1540 there is a change in French thinkers assumptions about themselves their country and their place in the world This evolutionary change is examined from multidisciplinary points of view providing readers with tools for interpreting defining and understanding it in a broader sense The character of the change being explored here is neither rupture nor revolution It is a displacement of center that contributes to or in some cases actually creates a changed relation between past and mid sixteenth century present as well as between that present and attitudes toward the future During the period around 1540

French thinkers and French perceptions opened to the notion that what had never been now could be what for lack of a better term called the new often accompanied by a nationalism proclaiming it for France This brings a fresh understanding of what it means to be French in language in music even in food It brings an expansion of categories to be treated as part of the French economy like Canadian fish or more surprisingly leisure or music Marian Rothstein is Professor of French at Carthage College

Colloquies Desiderius Erasmus,1997 Erasmus Familiar Colloquies grew from a small collection of phrases sentences and snatches of dialogue written in Paris around 1497 to help his private pupils improve their command of Latin
