Begging Questions Streetlevel Economic Activity And Social Policy Failure:

Begging questions Dean, Hartley, 1999-09-16 Begging is widely condemned but little understood It is increasingly visible yet politically controversial Recent changes in British social security housing and mental health provision can be seen to have exacerbated the extent of begging in the UK and its persistence is an indictment of the failures of social policy throughout the Western world Though begging is intimately linked to issues of street homelessness mental health substance abuse and social exclusion this book specifically focuses on begging as a distinctive form of marginalised economic activity It looks at the significance of face to face contact between beggars and passers by the preoccupation with the classification of beggars the stigma associated with begging and judgements required by the passer by the place of begging in the spectrum of informal economic activity The book provides a comprehensive overview and will stimulate theoretical policy and methodological debates driving forward the research agenda It is important reading for researchers academics and students in social policy social work sociology politics and socio legal studies and also for social work practitioners and particularly policy makers

New Perspectives on the Public-private Divide Law Commission of Canada, 2003 The separation between public and private spheres has structured much of our thinking about human organizations Scholars from nearly all disciplines use the notion of a public private divide as a means to order knowledge and better understand the mechanisms that govern and shape human behaviour and institutions In legal and socio legal analysis the distinction informs the differences between state and non state actors and between public good and private property This rich collection of essays explores how the public private divide influences challenges and interacts with law and law reform Through various case studies the contributors reflect on this complex dichotomy s role in structuring the socio legal environment for the personal social economic and governance relationships of citizens They demonstrate that while the split between the public and the private is a useful way to understand the world it is always only an ideological construct and as such open to challenge Of primary interest to legal thinkers and practitioners this volume will also hold sway with sociologists historians and political scientists with an interest in the nature of the public private distinction and its role in law and society British Social

Attitudes Roger Jowell, John Curtice, Alison Park, Katarina Thomson, Lindsey Jarvis, Catherine Bromley, Nina Stratford, 2000-11-23 I ve always enjoyed reading the British Social Attitudes survey which shows what the British people really think as opposed to what journalists and politicians like to pretend they think John Pilger Britain is a well documented nation We know a lot about the characteristics of our society who we are and what we do We know much less about what we think and feel about our world and ourselves The indispensable annual British Social Attitudes survey fills this gap It compiles describes and comments on a range of current social attitudes The information is derived from interviews carried out by the National Centre for Social Research s own interviewers among a nationwide sample of around 3 500 people each year The series seeks to chart changes in British social values over a period of time in relation to other changes in society

and is core funded by the Gatsby Charitable Foundation A full report is published each year The 17th Report summarizes and interprets data from the most recent survey as well as making comparisons with findings from previous years The data are publicly available through the ESRC Data Archive at the University of Essex

Media in Motion Elisabeth Eide, 2016-04-29 Owing to increased migration dating from the 1990s Nordic countries have gone through substantial cultural and social changes resulting in increased debate surrounding the politics of multiculturalism One of the central realms of the discussion around multiculturalism in the Nordic region concerns the media which is considered to be a vital factor in the construction of society's values as well as an essential tool in the integration process of migrants providing as it does a symbolic arena for learning about and becoming part of society This collection draws together the latest research from Denmark Finland Norway and Sweden to look at different aspects of the relationship between media and migration in the Nordic region Exploring the role played by the media in nation building and the power of the media in the definition of who belongs in society Media in Motion examines the practices of inclusion and exclusion that characterise mainstream media representations The book also examines the manner in which recent technological changes suggest the emergence of

a transnational and cosmopolitan media landscape a space which blurs the boundaries of the national and transnational as well as between the public and the private with significant implications for the ways migrants may take and become part of society As such it will be of interest to those working in the fields of media race and ethnicity colonialism and postcolonial studies and migration

BOOK JACKET **Sociology** ,2000 **Getting by** Suzanne Fitzpatrick,Catherine Kennedy,2000 Despite the growing concern in recent years about begging in British cities there is a paucity of contemporary empirical evidence on the experiences and causes of begging and on the characteristics of those people who beg *Getting by* explores the links between begging and rough sleeping in Glasgow and Edinburgh and assesses the impact of the emergence of *The Big Issue* street magazine on this relationship The report looks at why people beg how people experience begging in what circumstances people would stop begging whether begging is closely associated with rough sleeping and or other forms of homelessness whether *The Big Issue* provides its vendors with a real alternative to begging *Getting by* argues that the multiple problems experienced by those living on the streets need to be recognised and advocates an holistic approach to the provision of services The report highlights the importance of policies aimed at preventing the need for people to resort to begging It provides a range of recommendations on appropriate services including social work health housing and drugs and alcohol and on government policies on social exclusion employment and the benefits system the police and the criminal justice system This qualitative study is based on interviews with rough sleepers *Big Issue* vendors people who beg and agency workers in Glasgow and Edinburgh It is essential reading for policy makers and practitioners in local authorities and

voluntary organisations working in the field of homelessness as well as anyone with an interest in begging and rough sleeping The report also has broader implications for a range of service working with people at the sharpest end of social exclusion American Book Publishing Record ,2000-07 *The British National Bibliography* Arthur James Wells,2000
