Community Psychology and the Schools George J. Allen, Jack M. Chinsky, Stephen W. Larcen, John E. Lochman, Howard V. Selinger, 2017-09-13 Originally published in 1976 this volume begins with a theoretical overview of the major trends in the community psychology movement at the time as well as a perspective on how the field was developing The emphasis is on the utility of combining a preventative community centered orientation with an applied behavioral analytic focus The authors take general theoretical notions and demonstrate how they can be turned to concrete

methods of dealing with specific practical problems that occur in implementing a real life program of community oriented intervention The authors present an innovative model for developing a low cost and effective delivery system for mental health services in public schools They describe the actual development and implementation of such a system in the school and also include a comprehensive evaluative scheme for determining the efficacy of this type of endeavor The actual behavior change strategies that are employed can be used effectively by teaching personnel or psychologists on either a large or small scale A final unique feature of the volume is the inclusion of a program that will assist teachers and mental health professionals in helping elementary school students learn social problem solving skills

Behavioral Approaches to Crime and Delinquency Edward K. Morris, Curtis J. Braukmann, 2012-12-06 The systematic application of behavioral psychology to crime and delinquency was begun only 20 years ago yet it has already contributed significantly to our practical knowledge about prevention and correction and to our general understanding of a pressing social problem In this handbook we review and evaluate what has been accomplished to date as well as what is currently at the leading edge of the field We do so in order to present a clear comprehensive and systematic view of the field and to promote and encourage still more effective action and social policy reform in the future The chapters in this text have been written by professionals who were among the original innovators in applying behavioral psychology to crime and delinquency

and who continue to make critical contributions to the field's progress and by a new generation of energetic young professionals who are taking the field in important and innovative directions. The contributors have attempted to review and evaluate their areas with critical dispassion to provide thorough but not overly specialized discussion of their material and to draw implications for how research application and social policy might be improved in the future. For our part as editors we have tried to foster integration across the chapters and to provide background and conceptual material of our own.

Behavioral Methods in Social Welfare Steven Paul Schinke, James. K Whittaker, Scott Briar, 2017-09-08 *Behavioral Methods in Social Welfare* offers positive proof that behaviorism has come of age in social work. Steven Paul Schinke and the contributors to this volume are social work practitioners who document their attempts to extend the basic tenets of behavioral psychology from the laboratory clinic and classroom to the full range of client groups and social problems that make up the practice of social work. In social work education traditionally to the extent it appeared in the curriculum at all behavioral content appeared in electives or in courses not focused on practice. It is a true measure of progress that behavioral methods are now visible integral component of social work education and practice. The authors of each piece in this collection indicate progress in developing an empirically based approach to social work practice. Despite the impressive documentation contained in the present volume no conclusive evidence as to the effectiveness of behavioral methods exists. What behavioral methods do offer however is a systematic format for both problem intervention and evaluation that over time should produce a more empirically based practice. A promising sign well documented in the present effort is the facility with which this book has subjected practice procedures to the rigor of research and evaluation. This blending of clinical practice and research develops the sense of competence that student practitioners acquire in understanding and controlling both the art and science of their clinical practice. Steven Schinke and his colleagues offer a series of snapshots of important work in process. Their collective portrait provides a fresh perspective and new stimulus for all social work practice as well as an affirmation that disciplined responsive and sensitive social work intervention can make a difference in the lives of people.
