Behaviour Of Micro Organisms:

Behaviour of Micro-organisms A. Perez-Miravete, 2012-12-06 Organisms are constantly being bombarded by stimuli in their environment and also by internal stimuli and a common way of responding is by movement This is an aspect of irritability or excitability or behaviour Response to stimuli by movement is found in all organisms it represents one of the universalities of biology Yet at the molecular level it is one of the least understood of biological phenomena Micro organisms are no exception If motile they respond to stimuli by active movement taxis if sessile they respond by growth movements tropisms Responses by movement are known among micro organisms to such stimuli as chemicals electric current gravity light temperature touch and vibrations The behaviour of micro organisms is an exciting subject first of all for its own sake but in addition because it may reveal facts and concepts that are applicable to understanding behaviour in more complicated organisms even us and because it may help to understand the movement of cells and tissues during differentiation and development of higher plants and animals

Behaviour of Micro-organisms A. Perez-Miravete, 1973 **Behaviour of Micro-organisms**, 1973 Behaviour of Micro-Organisms Miravete Perez A., 1970 **Behaviour of Micro-Organisms** M. A.
