Burgin,2025-09-17 Perfect for the curious mushroom novice this charming Victorian guide introduces the mysterious world of fungi with key insights on mushroom identification and habitat Written by Ellen M Dallas and Caroline A Burgin at the turn of the twentieth century Among the Mushrooms walks readers through the basics of mushroom identification structure life cycle and habitat in a clear and approachable way It covers key features to look for in the field going through the basics of mushroom identification structure growth and ecology offering clear explanations and practical advice A delightful window into nineteenth century mycology and its scientific sensibilities this book blends factual instruction and a lyrical appreciation of the natural world in an engaging introduction to the world of mushrooms **Among the Mushrooms** Ellen M. Dallas,Caroline A. Burgin,1900 **Mushrooming Without Fear** Alexander Schwab,2007-10-17 Eight rules of mushroom gathering color photographs identification checklist recipes advice on handling and **Among the Mushrooms** Caroline Burgin,Ellen Dallas,James Zimmerhoff,2017-07-10 This necessity for a simple guide book has been felt by many Let us give our own experience We procured a list of works on fungi and looked for some volume not too deep for our comprehension nor too costly for our purse Among those we found were Handbook for Students Taylor Edible and Poisonous Fungi Cooke and a pamphlet by Professor Peck Mushrooms and Their Uses This seemed to be the one that we could comprehend most easily and so armed with it and another pamphlet by Professor Underwood called Suggestions to Collectors of Fleshy Fungi which contained a simple key we started out to make discoveries We afterward procured some publications of Mr C G Lloyd which were of great assistance and lastly a glossary published by the Boston Mycological Society a necessary addition to our library We found Professor Peck s book was confined to edible mushrooms and it soon became too limited to satisfy our craving for further knowledge it incited a longing to know something of inedible fungi The rest is soon told We were advised to get either a copy of Stevenson s British Fungi or of Masee s works We did so but found them too advanced to be readily used by the unlearned Then the idea arose How can we help others in their difficulties This little book is the answer It will not be of use to advanced students they will only criticise and discover how much has been left unsaid but the beginner is more easily satisfied with the extent of information gained and if a taste for knowledge is encouraged the object of this book is attained This explanation will also account for the use of simple terms We find a tiny fungus which looks like a brownish bird s nest

with some miniature eggs in it or a shining white mushroom and we are told its name in Latin it is described in terms meaningless to the ignorant we lose interest and our attention flags We began for pleasure and recreation but it became irksome and fatiguing and the subject which might have amused us and helped to pass many an idle hour is put aside and abandoned Yet this study is a most fascinating one We all long for pleasant subjects of thought in our leisure hours and there can be nothing more diverting and absorbing than the investigation of the beautiful and familiar plants around us When we leave the bustling noisy streets of a city and go into the quiet fields and woods the contrast is very great A walk for exercise alone is often dull and tiresome We cannot be assured of pleasant companions nor is there always a fine view or picturesque scenery to reward us during our strolls but there are plants to be found and gathered and when these fail us then the bright hued mushrooms may arrest our attention The discovery of new specimens the learning their names the knowledge of their curious organizations will all add an interest to our lives It will inspire us with a love of nature and open our eyes to many objects of which we have before been unobservant Besides this it obliges us to be accurate Our descriptions must be exact or they are of no use Let us imagine ourselves taking a stroll in the woods or down some shady lane and see what we can find there The golden rod and asters adorn the roadsides the odors of the sweet gale and scented fern are wafted gratefully to our senses as we pass along the lanes and there among the fallen leaves at the very edge of the woods peers out a bright yellow mushroom brighter from the contrast to the dead leaves around and then another close by and then a shining white cap further on a mouse colored one gray and silky in texture What a contrast of colors What are they By what names shall we call them Let us first carefully dig up the yellow one We have brought a basket and trowel and can examine them thoroughly We must dig down deep so as not to break off the stem
