Building Design Portfolios Sara Eisenman, 2006-06-01 Presenting one's portfolio is where every designer begins his or her career Therefore crafting a portfolio whether online or

for presentation in person is an essential skill for survival. Because a portfolio can make or break a career, it is vital that designers go out armed with all the right moves and materials. This book talks both to the professionals who have both designed their own portfolios and those on the other side of the table who have looked at scores of portfolios to uncover the tips and tricks that have won jobs as well as the must-avoid moves that have lost opportunities. This book is not only a handbook for dos and don'ts; it also provides plenty of inspiration from a wide collection of portfolios, both virtual and real life. This book asks leaders in the field about the real-world realities of presenting one's work for consideration and answers the question: What sells and what doesn't?

Design Portfolios Diane Bender, 2017-02-09. Today's students of architecture, interior design, and landscape design need to master the art of marketing themselves via multiple print and digital formats. This third edition of *Design Portfolios* reflects contemporary portfolio practices and enables students to create portfolios that serve as both evolving collections of creative solutions to design problems and evidence of their abilities to visually relay messages. Readers will learn how to create not just a collection of design work but a unique marketing tool for a successful design career.

The Importance of Assessments Terry Powell, 2013. The purpose for this study was to find an assessment that is currently being used and is a common assessment familiar to others within the brick-and-mortar classroom and transform that assessment for use within the online learning environment. By using assessments, teachers can measure whether or not students are learning what it is they are teaching.

Methodology The purpose of this qualitative comparative case study was to study the relationships between creating portfolios and how this process impacted students within an online graphic design/digital imaging course. **Results** With this study, the intent was to lay the foundation for using portfolios in virtually any graphic design course and to be able to see the progress of students through their portfolios each week. Another intent of this study was to measure how a student's perceived self-efficacy changed during the process of creating a portfolio. **Conclusions** The uses of portfolios are common within the work force when trying to obtain a position with the fine arts, architecture, fashion design, graphic artists, orthodontists, and plastic surgeons. Angelo and Cross (1993, p. 114) and Drummond (2004) provided one of the first portfolio assessments within an online science course, which resulted in starting and completing this study for an undergraduate online graphic design course and opens the door for future use within other online courses within higher education. The following are appended: 1. Self-Efficacy Survey Control Group, 2. Self-Efficacy Survey Participants, 3. Rubric: Comprehension of Concepts in Design, and 4. Rubric: Comprehension of Skills in Design. Contains 8 tables.

The Graphic Designer's Guide to Portfolio Design Debbie Rose Myers, 2013-10-21.
