Theatrical Design and Production J. Michael Gillette, Richard Dionne, 2023 First courses in the world of theatrical design and production like the art they introduce come in a bewildering array of shapes sizes textures and colors Some students receive their introduction to this subject area in a general overview course that covers the design and production elements of scenery costumes lighting and sound in a single semester Other students may enjoy the luxury of an entire year in which to discuss the same material Still others may take individual courses that specialize in the theory and craft of the separate areas that comprise the field of theatrical design and technical production The course content is very flexible indeed To create a text that will serve the needs of all these courses is a distinct challenge I've tried to rise to that challenge by organizing the material in two ways The chapters appear in a logical sequence but each chapter is also an island of information that can stand alone My hope is that this organization will enable each instructor to pick and choose the type and amount of material that is appropriate for his or her particular course This type of organization also makes the text a useful reference for students to keep throughout their design and technical production careers
