achieve certainty Drawing on his own work in geometry optics astronomy and physiology Descartes developed the hypothetical method that characterizes modern science and this soon came to replace the traditional techniques derived from Aristotle Many of Descartes most radical ideas such as the disparity between our perceptions and the realities that cause them have been highly influential in the development of modern philosophy Discourse on the Method of Rightly Conducting the Reason, and Seeking Truth in the Sciences René Descartes,1903 *Rene Descartes* Rene Descartes,2017-01-05 Rene Descartes Discourse on the Method of Rightly Conducting the Reason and Seeking Truth in the Sciences by Rene Descartes The Discourse on the Method French Discours de la methode is a philosophical and autobiographical treatise published by Ren Descartes in 1637 Its full name is Discourse on the Method of Rightly Conducting One s Reason and of Seeking Truth in the Sciences French title Discours de la methode pour bien conduire sa raison et chercher la verite dans les sciences The Discourse on The Method is best known as the source of the famous quotation Je pense donc je suis I think therefore I am which occurs in Part IV of the work Good sense is of all things among men the most equally distributed for every one thinks himself so abundantly provided with it that those even who are the most difficult to satisfy in everything else do not usually desire a larger measure of this quality than they already possess And in this it is not likely that all are mistaken the conviction is rather to be held as testifying that the power of judging aright and of distinguishing truth from error which is properly what is called good sense or reason is by nature equal in all men and that the diversity of our opinions consequently does not arise from some being endowed with a larger share of reason than others but solely from this that we conduct our thoughts along different ways and do not fix our attention on the same objects For to be possessed of a vigorous mind is not enough the prime requisite is rightly to apply it The greatest minds as they are capable of the highest excellences are open likewise to the greatest aberrations and those who travel very slowly may yet make far greater progress provided they keep always to the straight road than those who while they run forsake it

**Discourse On Method, Meditations And Principles** Rene Descartes,2012-04-26 With the celebrated words I think therefore I am Descartes compelling argument swept aside ancient and medieval traditions He deduced that human beings consist of minds and bodies that these are totally distinct substances that God exists and that He ensures we can trust the evidence of our senses Ushering in the scientific revolution of Galileo and Newton Descartes ideas have also set the agenda for debate ever since By calling everything into doubt Descartes laid the foundations of modern philosophy

*Discourse on the Method for Conducting One's Reason Well and for Seeking Truth in the Sciences* Rene Descartes,2014-02 In the Discourse on Method for Conducting One's Reason Well and for Searching for Truth in the Sciences 1637 Descartes suggests that perfect knowledge can be achieved by means of perfect individual reasoning According to Descartes reason can only guarantee its truth seeking value in the personal sphere and even then only when it is gradually and systematically applied Descartes demonstrates his own method for generating perfectly reasoned knowledge but it is the model of this behavior and not the knowledge itself that ought benefit his readers The text is in this sense a testament to Descartes own progress as a practitioner of his own method Descartes exerts himself as the ultimate critic whose default stance is one of doubt and who wishes to reform his own thought according to the most rigorous standards of reason possible He does not succeed in following most of his maxims Nevertheless his experiment is a notable instance of the struggle for individual enlightenment First Descartes addresses the harms of the status quo organization of knowledge and its acquisition He identifies the vector by which falsehoods propagate themselves undetected among the disciplines of human knowledge The current realm of human knowledge is the product of design by committee in the sense that it is cumulative and collaborative meaning that previous errors in reasoning may serve as the ostensibly firm foundations for the current order of knowledge He alleges that no discipline of knowledge can be said to be entirely reasoned from empirical data He criticizes even the apparently objective systems of mathematics and logic for a deficiency of application Descartes points to controversies and inconsistencies between disciplines as evidence of imperfection among the sciences for if they were perfectly conceived they would be a single and uniform science In theory these unstable foundations could be reformed at the individual level with individual reason alone To this end Descartes performs his own experiment isolating himself from the order of human knowledge to the best of his ability He recommends that the individual reasoner enter a knowledge vacuum

that is void of the mental constructs with which other humans think Like Bacon Descartes wishes to distance himself from the logic of syllogism and abandon the Idols of the Theater Starting from a single absolutely true concept if one can reason it out one might gradually construct knowledge by the sole mechanism of pure reasoning resulting in trustworthy and verified blocks of knowledge which have been thought out by the individual reasoner and which ideally have empirical evidence in the world Descartes performs this role to demonstrate the solvency of the method to himself His first building block is perhaps the first warning signal with regard to the rest of his project but it is also one of the only reasoning sessions to which the readers have detailed access Descartes falls short even at this primary stage because he is unable to achieve a point zero of knowledge from which to start Beyond this it is evident from Descartes own writing that his good sense frequently makes reasoned but unreasonable leaps Indeed readers may only ponder the interim years in which Descartes moved from his starting point of I think therefore I am to his much more specific knowledge concerning the heart Descartes task of operating solely by means of individual reason is both impossible and inadvisable Furthermore his project is a performative contradiction the notion of individual reason opposes the adoption of collectively achieved knowledge yet the text serves the very purpose of intruding upon the reader s individual sphere of reason But for all of this project s weaknesses in practice Descartes project shifts the responsibility and procedure of enlightenment away from the elite class of thinkers into the domain of the autonomous reasoner
