In this module designed for grades three to five students design patterns to be used in a headress or similar linear strip. They explore properties of shapes lines of symmetry and part to part and part to whole relationships. The module provides numerous opportunities for the teacher to extend and adapt this curriculum from further explorations of fractions to Yup ik cultural knowledge. About the Series Math in a Cultural Context. This series is a supplemental math curriculum based on the traditional wisdom and practices of the Yup ik people of southwest Alaska. The result of more than a decade of collaboration between math educators and Yup ik elders these modules connect cultural knowledge to school mathematics. Students are challenged to communicate and think mathematically as they solve inquiry oriented problems which require creative practical and analytical thinking. Classroom based research strongly suggests that students engaged in this curriculum can develop deeper mathematical understandings than students who engage only with a procedure oriented paper and pencil curriculum.
