Hunt,1984 Personality and the Behavioral Disorders 2nd Edition published in two volumes and organized in six parts is a revision of J McVicker Hunt s classic source book on the scientific foundations of clinical psychology and psychiatry

Anxiety, Psychological Perspectives on Panic and Agoraphobia Richard S. Hallam,1985 This volume analyses the perplexing and often disabling form of distress known as anxiety from a psychological rather than a biomedical perspective illustrating the rich contribution that psychological theory has made and is making to this topic The first section extensively examines the clinical literature describing and delineating with case examples the cluster of characteristic features termed panic anxiety Research findings in other clinical areas such as alcohol dependence are shown to have conceptual and empirical links with panic anxiety The second section of the book reviews and evaluates the main theoretical approaches to anxiety including specific models of panic and agoraphobia challenging many traditional assumptions and advocating the analysis of anxiety as a socially constructed meaning imposed on experience rather than a theoretical concept or psychopathological state The methodological implications are discussed and a schematic model of panic anxiety is proposed The theoretical integration represents a major contribution to the resurgence of interest in this field and will be of relevance to all researchers and postgraduate students within the mental health professions FROM THE PREFACE This book has two main objectives The first is to describe a dimension of psychological distress I have called panic anxiety This takes up the first part of the book which surveys literature that is primarily descriptive and psychiatric The second objective is pursued in the second part of the book in which I examine a large number of theories of anxiety to see what they might have to offer in explaining the panic anxiety cluster of complaints I am therefore concerned to apply psychological theory to a real world problem that is to what people who seek professional help loosely describe as panic anxiety and fears of public situations The theoretical and experimental literature on anxiety is so vast that I have had to be disciplined and in no small measure prejudiced in favour of a particular theoretical perspective I have attempted as far as possible to treat anxiety as a lay construct that is as a social construction and not a scientific concept For this reason I have endeavoured to refer to reports of anxiety or to complaints of anxiety in order to avoid the common tendency to reify anxiety as a an entity which exists independently of the social origins of the term Accordingly I believe that the relevant question to ask is not What is anxiety but What are the antecedents of reports or complaints of anxiety It is intended that this book should provide a coherent perspective on a common form of psychological distress of value to therapists researchers and students of abnormal psychology In many ways the problems for which people seek help do not define natural areas of scientific research and so it is difficult to combine theoretical and practical interests in one book The complaints with which I am particularly concerned panic and fears of public places can be analysed to reveal scientific questions which have a significance much wider than the explanation of particular complaints made to professionals working in a clinical context Apart from its obvious social significance a clinical area is therefore simply a point of departure for scientific investigation My intention then is to use this

clinical area as an illustration of how such problems might be tackled from a theoretical perspective which is essentially psychological. The theoretical position I have adopted owes much to the views of Sarbin 1964, 1968, Mandler 1975 and Averill 1980a, b. In taking anxiety to be a lay construct I assume that the 'What is' questions rightly belong to the sociology of knowledge. Of course the applied psychologist also has substantive issues to consider. For example, How can this individual be helped to report calmness rather than anxiety or How can that individual

Agoraphobia and Panic Jeffrey E. Hecker, Geoffrey L. Thorpe, 1992. This book is a practitioner's guide to psychological treatment of anxiety disorders with the emphasis on panic disorder particularly among agoraphobics. The authors describe the methods of assessment and treatment that are most effective based on research in this area giving guidelines as to which problems to focus on and which treatments to use. Agoraphobia and Panic should be of particular interest to mental health clinicians, students in clinical psychology, counselling and social work.

Psychosocial Predictors of Agoraphobia, Simple Phobia, and Social Phobia Onset in a U.S. National Sample William J. Magee, 1993

The Agoraphobia Workbook C. Alec Pollard, Elke Zuercher-White, 2003-07-10. Being agoraphobic can take many forms and most people with agoraphobia are not completely shut-ins. Instead they may have trouble walking outside alone for fear of feeling dizzy and falling down or be afraid of driving on the freeway because they might faint or avoid public venues for fear of losing physical or emotional control in a crowded place. Whatever form agoraphobia takes it is a highly treatable and surprisingly common anxiety disorder. The Agoraphobia Workbook can help you or someone you love overcome agoraphobia in any of its forms. The book offers clear information about how the disorder develops and a practical step by step treatment strategy you can use to control specific fears and symptoms. In an interactive easy to follow style the workbook takes you through exposure and desensitization exercises. By taking it step by step you can work up to formerly difficult tasks like walking outside, driving, taking public transportation and going to stores and malls. The book also includes tips on avoiding relapses, managing setbacks and finding help and support.

Textbook of Anxiety Disorders Dan J. Stein, Eric Hollander, 2002. This one stop resource for both clinicians and researchers details not only the rigorous diagnostic schemas, sophisticated psychobiological models and effective pharmacotherapy and psychotherapy interventions developed during the past few decades but also the latest advances in research theory and clinical knowledge in this diverse field.

Biological Aspects of Affective Disorders Roger W. Horton, Cornelius L. E. Katona, 1991. Biological research in the affective disorders has been an international growth industry for several years. Biological Aspects of Affective Disorders is a comprehensive introduction to the biochemical, pharmacological and genetic aspects constituting the abnormalities that may underlie the diseases of depression and mania together with the current understanding of the clinical features and management of affected patients.
