## **Aids And The Heterosexual:**

**AIDS and the Heterosexual Population** Lorraine Sherr, 1993 The research findings which are reported here and the interventions which are suggested are drawn from work with prostitutes adolescents discordant couples and bisexual men The chapters explore the way in which AIDS affects the heterosexual family the way it permeates via the prison system the range and extent of differing needs among sufferers the role of alcohol and drugs in HIV infection and prevention the impact of attitude studies and HIV testing counselling and partner notification The contributors all experts in the field are drawn from the USA Europe Australia Asia and Africa Heterosexuals are the largest group affected by AIDS and HIV infection As those affected have tended to come from the poorer more disadvantaged social groups worldwide however they have received a disproportionately small degree of attention This book is an attempt to adjust the imbalance It takes a look at the epidemiology and psychosocial factors involved in the incidence of HIV in groups *AIDS and the Heterosexual* J. L. Denser, 1991 THE MOST COMPREHENSIVE BOOK EVER WRITTEN ON THE HETEROSEXUAL TRANSMISSION OF HIV FOR THE GENERAL PUBLIC Over 50 000 scientific articles were reviewed to obtain the most applicable material Information extracted from the scientific literature has been translated into a language anybody can understand The book begins by covering all aspects of the sexual transmission of the AIDS virus including the role of intravenous drug use in the spread of infection There are discussions on how rapidly the epidemic is spreading among heterosexuals the contribution of this spread by sexual contacts with prostitutes The latter half of the book focuses on the issue of risk control to prevent infection Detailed coverage of the most current preventive measures against HIV infection is provided so the reader can more fully utilize the knowledge gained in the earlier chapters to protect himself or herself The material presented is applicable to any sexually active individual However emphasis has been directed towards persons of 16 25 years of age where the epidemic is spreading uncontrolled Main health care professionals nurses sex therapists counseling psychologists clinical social workers etc will also benefit from this compendium of important facts on AIDS many of which have never been published [The Myth of Heterosexual AIDS](#) Michael Fumento, 1993 In a searing analysis of the AIDS epidemic Fumento thoroughly documents how and why AIDS is not a heterosexual disease Despite fear and hysteria often fueled by partisan politics AIDS remains largely restricted to two high risk groups homosexual men and IV drug users *Crisis* William H. Masters, Virginia E. Johnson, Robert C. Kolodny, 1988 *Crisis* D William Masters, M, William H. Masters, Virginia E. Johnson, Robert C. Kolodny, 1992-01-29 **Heterosexual Africa?** Marc Epprecht, 2008-08-15 Heterosexual Africa The History of an Idea from the Age of Exploration to the Age of AIDS builds from Marc Epprecht s previous book Hungochani which focuses explicitly on same sex desire in southern Africa to explore the historical processes by which a singular heterosexual identity for Africa was constructed by anthropologists ethnopsychologists colonial officials African elites and most recently health care workers seeking to address the HIV AIDS pandemic This is an eloquently written accessible book

based on a rich and diverse range of sources that will find enthusiastic audiences in classrooms and in the general public Epprecht argues that Africans just like people all over the world have always had a range of sexualities and sexual identities Over the course of the last two centuries however African societies south of the Sahara have come to be viewed as singularly heterosexual Epprecht carefully traces the many routes by which this singularity this heteronormativity became a dominant culture In telling a fascinating story that will surely generate lively debate Epprecht makes his project speak to a range of literatures queer theory the new imperial history African social history queer and women s studies and biomedical literature on the HIV AIDS pandemic He does this with a light enough hand that his story is not bogged down by endless references to particular debates Heterosexual Africa aims to understand an enduring stereotype about Africa and Africans It asks how Africa came to be defined as a homosexual free zone during the colonial era and how this idea not only survived the transition to independence but flourished under conditions of globalization and early panicky responses to HIV AIDS

**Heterosexual Transmission of AIDS** Contraceptive Research and Development Program. International Workshop, Nancy J. Alexander, 1990-03-19 Since the HIV virus was first identified as the cause of AIDS basic research and epidemiological data have accumulated dramatically and rapidly Yet with all that is known about the virus surprisingly little is known about precisely how it is actually transmitted Focusing on the sexual transmission prevention and control of the HIV virus in heterosexuals Heterosexual Transmission of AIDS examines the sexual mechanisms of transmission including HIV interactions with sperm semen and cervical and vaginal secretions Exploring the principle risk factors in heterosexual transmission of HIV the book offers authoritative information on routes of transmission and discusses the impact of specific contraceptive methods in controlling the spread of the disease Includes an overview of the biology of retroviruses and their pathogenicity and describes animal models for investigating HIV infection mechanisms and transmission prevention

**Bisexualities and AIDS** Peter Aggleton,2020-08-11 Since early on in the epidemic there has been much interest in the role that bisexual behaviour among men may play in HIV transmission This text reviews from an international perspective what has been learned about male bisexuality in countries as diverse as Peru and Britain Its authors examine the forms that bisexuality takes in different cultures what it means to the men concerned and whether or not such behaviour poses special risks The implications of such enquiry for HIV prevention efforts are also examined
