a product of the social construction of gender and other dimensions of power and status within a particular culture and at a particular historical moment this book offers the necessary locally grounded analysis Focusing on the case of Nepal from where 5 000 to 7 000 thousands of Nepali girls and women are trafficked each year primarily to India Mary Crawford assesses how the social construction of trafficking the concept and its representation in discourse are influenced by the dynamics of gender caste and the development establishment The defining figure is an innocent na ve young girl being lured or duped into leaving the safety of her village The trafficking victim is portrayed as backward however she is backward in specific ways that resonate with Nepal s struggle to resist and yet encompass Western influence This view may lead to paradoxical effects in which efforts to protect girls and women instead restrict their human rights Rather than seeing women as universalized victims Crawford assesses how the social construction of trafficking in a particular society affects girls and women who live in that society In this book the author s voice as a woman a feminist and a social scientist immersed in a foreign way of life illuminates aspects of this process and highlights the subjectivity of urban women It makes the connection between Nepali subjectivities and a problem of international significance the trafficking of girls and women The book provides a model for other locally grounded accounts of sex trafficking to counter the universalizing rhetoric of the mass media and some anti trafficking activists filling a niche in South Asian Studies and Women s Studies

**A Feminist Approach to Sensitive Research** Tricia Ong,2022-12-07 This book explores the development and implementation of the Clay Embodiment Research Method CERM with one of the most stigmatized oppressed and marginalized groups of women in Nepal sex trafficked women It argues for the use of a feminist approach to such research given the prevailing patriarchal norms cultural sensitivity of reproductive health stigmatization of sex trafficking and low literacy of the women involved Beginning with an exploration of the author s relationship with Nepal and the women who guide the study and the realization that a more accessible research approach was needed than the techniques otherwise commonly used it discusses the use of clay and photography as ideal entry points to engaging with the women in the research and creating this ethical methodology for self empowerment Not only does the volume highlight extraordinary insights offered by the women involved in this study through the application of CERM but also the recognition that its use requires expertise that can deal with the potential elicitation of trauma The book makes the case for further study on improving the method s use in research education and therapy involving low literate stigmatized oppressed and marginalized populations particularly where cultural sensitivity is an important consideration A Feminist Approach to Sensitive Research is suitable for students scholars and researchers in Gender Studies Sociology Health Studies Anthropology and Asian Studies
