## **Air Quality:**

**Air quality** Great Britain: Parliament: House of Commons: Environmental Audit Committee,2011-11-14 Dangerous levels of particulate matter PM2.5 or PM10 and chemicals such as NO2 in the air are contributing to tens of thousands of early deaths every year in UK cities Yet the Committee found that Ministers appear to be actively trying to dilute safety standards to avoid EU fines 30 000 deaths in the UK were linked to air pollution in 2008 with 4 000 in London alone But business plans produced by the Department for Transport and Defra do not even mention air quality despite a commitment in the Coalition agreement to work towards full compliance with EU air quality standards The Government will be able to pass EU fines for air pollution breaches to local authorities subject to new procedures in the Localism Bill However this report raises a number of concerns about the ability of councils to tackle this problem without coordination and assistance from central Government and points out that the causes of poor air quality are often beyond an individual authority's control The committee is calling on the Government to establish a national framework of low emissions zones to help local authorities reduce traffic pollution It is also urging Ministers to launch a public awareness campaign to drive air quality up the political agenda Under European Union air quality laws the daily pollution levels of PM10 must not be above the legal limit on more than 35 days in a year By the 21 April 2011 London had already exceeded this year's target according to the Campaign for Clean Air in London

Non-Exhaust Emissions Fulvio Amato, 2018-01-02 Non Exhaust Emissions An Urban Air Quality Problem for Public Health comprehensively summarizes the most recent research in the field also giving guidance on research gaps and future needs to evaluate the health impact and possible remediation of non exhaust particle emissions With contributions from some of the major experts and stakeholders in air quality this book comprehensively defines the state of the art of current knowledge gaps and future needs for a better understanding of particulate matter PM emissions from non exhaust sources of road traffic to improve public health PM is a heterogeneous mix of chemical elements and sources with road traffic being the major source in large cities A significant part of these emissions come from non exhaust processes such as brake tire road wear and road dust resuspension While motor exhaust emissions have been successfully reduced by means of regulation non exhaust emissions are currently uncontrolled and their importance is destined to increase and become the dominant urban source of particle matter by 2020 Nevertheless current knowledge on the non exhaust emissions is still limited This is an essential book to researchers and advanced students from a broad range of disciplines such as public health toxicology atmospheric

sciences environmental sciences atmospheric chemistry and physics geochemistry epidemiology built environment road and vehicle engineering and city planning In addition European and local authorities responsible for air quality and those in the industrial sectors related to vehicle and brake manufacturing and technological remediation measures will also find the book valuable Acts as the first book to explore the health impacts of non exhaust emissions Authored by experts from several sectors including academia industry and policy Gathers the relevant body of literature and information defining the current knowledge gaps and future needs

**Air Quality Management in the United States** National Research Council, Division on Earth and Life Studies, Board on Atmospheric Sciences and Climate, Board on Environmental Studies and Toxicology, Committee on Air Quality Management in the United States, 2004-09-30 Managing the nation's air quality is a complex undertaking involving tens of thousands of people in regulating thousands of pollution sources The authors identify what has worked and what has not and they offer wide ranging recommendations for setting future priorities making difficult choices and increasing innovation This new book explores how to better integrate scientific advances and new technologies into the air quality management system The volume reviews the three decade history of governmental efforts toward cleaner air discussing how air quality standards are set and results measured the design and implementation of control strategies regulatory processes and procedures special issues with mobile pollution sources and more The book looks at efforts to spur social and behavioral changes that affect air quality the effectiveness of market based instruments for air quality regulation and many other aspects of the issue Rich in technical detail this book will be of interest to all those engaged in air quality management scientists engineers industrial managers law makers regulators health officials clean air advocates and concerned citizens

**The Regulatory Approach to Air Quality Management** Winston Harrington, 2016-03-17 In the wake of the Clean Air Amendments of 1970 in the United States sources of emissions could be held accountable for the degradation of air quality in the local environment This case study of air quality management in New Mexico was produced to shed some light on the procedures and activities used by agencies in order to control air quality Originally published in 1981 Winston Harrington uses New Mexico as a case study for its largely centralised control system in Santa Fe to explore the behaviour of air quality agencies and pollution sources and comments on policy implications from this study's conclusions This title will be of interest to students of environmental studies and policy makers

*Managing Indoor Air Quality* H. E. Burroughs, Shirley J. Hansen, 2004 This practical desk reference is structured to serve as a guide and information resource both on treating existing indoor air problems effectively and on prevention costly IAQ problems from occurring in the first place Finding solutions to indoor air quality problems is often a complex multifaceted multidisciplinary

endeavor A single discipline approach from the environmental engineer the industrial hygienist or the medical doctor unfortunately tends to narrow both the control and the treatment options This book cuts across these professions without being limited by the specificity and bias of any one discipline to offer those concerned with the total facility a broader more comprehensive approach to managing indoor air quality and mitigating indoor air quality problems The third edition has undergone extensive updates and editing in response to the rapid pace of changes and advances in the IAQ industry most notably the new chapter on building security and the increased emphasis on mold related issues Jacket
