Air and Water (Classic Reprint) Vivian Byam Lewes, 2017-12-14 Excerpt from *Air and Water* IN this little book I have attempted to bring before my readers the wonderful changes and actions which are going on around them in our atmosphere and the even more marvellous work which water is performing in nature A knowledge of the relations which exist between our health and the air we live in and of the effects which water and its various impurities have upon our system is so important and has so wide a bearing upon the comfort and well being of the human race that this knowledge should form an important factor in our National Education Unfortunately it is only of late years that the true importance of natural science has been recognized and it is often found that amongst the well educated classes but little is known of the subject whilst in an ordinary commercial education the time devoted to science is small indeed About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
