only topics that are currently the focus of blue carbon studies i.e. sedimentary carbon stock and accumulation rate but also CO₂ gas exchange between the atmosphere and shallow coastal ecosystems carbon storage in the water column as refractory organic carbon and off site carbon storage Including highly original contributions this comprehensive work inspires research beyond the specific regions covered by the chapters The suite of new concepts and approaches is refreshing and demonstrates that blue carbon research is indeed a vibrant new field of research providing deep insights into neglected aspects of carbon cycling in the marine environment At the same time the book provides guidance for policy makers to deliver benefits to society for example the inclusion of blue carbon as a carbon offset scheme or the Nationally Determined Contribution NDC in the Paris Agreement and also for building resilience in coastal socio ecosystems through better management This book is intended for all those interested in the science and management of coastal ecosystems

Sea Salt Aerosol Production Ernie R. Lewis, Stephen E. Schwartz, 2004-01-09 Published by the American Geophysical Union as part of the Geophysical Monograph Series Volume 152 Sea salt aerosol SSA exerts a major influence over a broad reach of geophysics It

is important to the physics and chemistry of the marine atmosphere and to marine geochemistry and biogeochemistry generally. It affects visibility, remote sensing, atmospheric chemistry, and air quality. Sea salt aerosol particles interact with other atmospheric gaseous and aerosol constituents by acting as sinks for condensable gases and suppressing new particle formation, thus influencing the size distribution of these other aerosols and more broadly influencing the geochemical cycles of substances with which they interact. As the key aerosol constituent over much of Earth's surface at present and all the more so in pre-industrial times, SSA is central to description of Earth's aerosol burden. **India Rubber World**, 1927
