Coping with Population Challenges Louise Lassonde,2014-04-23 Despite rapidly decreasing rates of population growth caused by reduced fertility in the majority of world regions demographers are predicting that the world s population will still double by the year 2050 The question is therefore no longer the traditional one of whether the planet can support so many people but how to provide a sustainable future for ten billion individuals Quantitative problems have become ethical ones Coping with Population Challenges addresses these issues in the context of international debate and agreements since the first World Population Plan of Action in 1974 to the 20 year Programme of Action adopted at the International Conference on Population and Development in Cairo in 1994 The author describes how the Programme of Action focalizes on women s issues reproductive choice and the notion of the individual However she identifies a number of important but neglected areas of the debate that the Programme failed to address and brings to light some of the inconsistencies that need to be resolved if the Programme is to be implemented The author also looks at the underlying ethical dimension of all choices relating to the population issue and suggests measures and machinery for giving effect to states commitments including reformulating problems and defining the appropriate economic framework for solutions The book is an excellent introduction for the non specialist to a very topical debate and a useful reference for researchers LOUISE LASSONDE is director of the Fondation du Devenir Geneva In her capacity as anthropologist and demographer Dr Lassondc has worked closely with the United Nations and non governmental organizations in many countries Originally published in 1997

social sciences **Population Reports** ,1981 **Causes and Alleviation of Poverty** A. F. Petrone,2002 It has been said that the poor will always be with us But that does not mean we are obliged to ignore squalor Concern about poverty stretches across national borders from the third world to the street corners of Manhattan whether one believes the poor are victims of their own shortcomings or of poor public policy the impoverished cannot be ignored This book collects a set of essays exploring the unavoidable issue of poverty A broad array of scholars present studies and opinions about where the poor come from and what we can do to help them **The Cumulative Book Index** ,1999 **The Encyclopedia of Global Population and Demographics: Jamaica-Zimbabwe** Immanuel Ness,1999 **Current Geographical Publications** University of Wisconsin--Milwaukee.
