**East-West Trade** Alec Nove,1978 *National Security And Technology Transfer* Gary K. Bertsch,2019-02-22 The deterioration of detente in the wake of the ongoing Soviet arms build up has sharply focused the East West trade debate on the question of advanced technology transfer from the United States and its allies to the Soviet bloc The transfer and acquisition of high technology have become central ingredients in super power relations and are key elements of any national security policy President Reagan among others has questioned the wisdom of the policies of the 1960s and early 1970s when trade with the Soviet Union and Eastern Europe expanded rapidly At recent industrial nation summits conferees of Western countries agreed to high level review of their East West technology trade policies But in light of the apparent West European commitment to continue and expand trade with the East as exemplified by the Siberian gas pipeline project and the growing U S opposition to such technology transfer divisions between U S and Western trade policies toward the East are likely to become increasingly acute in the years ahead Professors Bertsch and McIntyre have selected comprehensive and representative articles to examine the question of technology transfer from a variety of perspectives political economic and military emphasizing both the U S and the Western allies points of view and offering insights into the complex issues raised by the strategic dimensions of East West trade **Newsletter** ,1980 **Department of State News Letter** United States.
