**Earning and Learning** Susan E. Mayer, Paul E. Peterson, 2010-12-01 A Brookings Institution Press and Russell Sage Foundation publication Education is one of the largest sectors of the U S economy yet scholars educators policymakers and parents do not agree about what the money spent on education really buys In particular they do not agree on how much education improves children s ability to learn or whether the things children learn in school truly improve their chances for success as adults If schooling increases how much students know and what they know does pay off later then it is important to ask what schools can do to increase students learning and earning The essays in this book report estimates of the effects of learning on earnings and other life outcomes They also examine whether particular aspects of schooling such as the age at which children begin school classroom size and curriculum or structural reform such as national or statewide examinations or school choice affect learning Taken together their findings suggest that liberals are correct in saying that more investment is needed in early education that class sizes should be further reduced and that challenging national or state standards should be established But they also provide support for conservatives who ask for a more demanding curriculum and greater school choice Contributors include John Bishop Eric Hanushek James Heckman Christopher Jencks Caroline Minter Hoxby Fred Mosteller and Christopher Winship

Peterson (Ed), 2009 Public private partnerships in education exist in various forms around the world in both developed and developing countries Despite this and despite the importance of human capital for economic growth systematic analysis has been limited and scattered with most scholarly attention going to initiatives in the United States This volume helps to fill the gap bringing together recent studies on public private partnerships in different parts of the world including Asia North and South America and Europe These initiatives vary significantly in form and structure and School Choice International offers not only comprehensive overviews including a cross country analysis of student achievement but also detailed studies of specific initiatives in particular countries Two chapters compare public and private schools in India and the relative efficacy of these two sectors in providing education Other chapters examine the use of publicly funded vouchers in Chile and Colombia reporting promising results in Colombia but ambiguous findings in Chile and student outcomes in publicly funded privately managed schools similar to American charter schools in two countries Colombia s concession schools and the United Kingdom s City Academies Programme Taken together these studies offer important insights for scholars practitioners and

policymakers into the purposes directions and effects of different public private educational initiatives Contents of this book include 1 Perspectives in Public Private Partnerships in Education Rajashri Chakrabarti and Paul E Peterson 2 Public Private Partnerships and Student Achievement a Cross Country Analysis Ludger Wossmann 3 Mobilizing the Private Sector in the United States a Theoretical Overview Thomas J Nechyba 4 The Practice of Public Private Partnerships Norman LaRocque 5 Public Private Schools in Rural India Karthik Muralidharan and Michael Kremer 6 School Sector Effects on Student Achievement in India Geeta G Kingdon 7 School Vouchers in Colombia Assisted by Eric Bettinger 8 The Public Private School Controversy in Chile Cristian Bellei 9 The Concession Schools of Bogota Colombia Felipe Barrera Osorio 10 Public and Private Schooling Initiatives in England Stephen Machin and Joan Wilson and 11 Education Contracting Scope of Future Research Harry A Patrinos An index is included
