Art And Science Of Managing Public Risks V S Ramamurthy,Dinesh Kumar Srivastava,Shailesh Nayak,2022-04-08 The COVID 19 and the onslaught of Climate Change have exposed the fragility of our lives and ecosystem Natural disasters like asteroid impact earthquakes tsunamis volcanic eruptions floods cyclones etc and pandemics like plagues smallpox cholera tuberculosis malaria etc have been man s nemesis from the beginning of time This list of public risks has now expanded to include pollutions industrial disasters and very many new confusing and emerging technologies How have governments handled these public risks How have they convinced people to take precautions under such emergencies What measures does one take for managing them and for the rescue relief and rehabilitation of the masses And most importantly how does one prepare the masses to face the risks without panicking It is argued that sermons dictates and discourses may not work in democratic societies Rather one needs a new breed of risk communicators who can enter into a dialogue with the people to prepare them for these challenges and to welcome truly beneficial new technologies The book takes a panoramic view of the issue of risks and illustrates the challenges and opportunities of the Art and Science of Managing Public Risks It celebrates the indomitable spirit of man who has leveraged science to predict where possible and provide solutions for managing these risks

A Place Called Nunavut Karin Irma Margot van Dam,Kim van Dam,2008 In 1999 Nunavut Territory was created in the Canadian Arctic The area is about 50 times as large as the Netherlands and is inhabited by a population of 30 000 85% of the population is Inuit the indigenous people in this area The central questions in this research project are what place or regional identities are being ascribed to Nunavut by different groups of people from within and from outside the region and how do these identities work In the process of the formation of the region the territorial Government of Nunavut is an important actor in producing a regional identity that is based on the cultural identity of the Inuit the Inuit Homeland This official regional identity creates a symbolic unity that is important in linking people to the region and through which the land the history and the people are united in a new territorial membership However there is no reason to assume that there is only one regional identity for Nunavut Different individuals or groups of people from within and from outside the region such as the people who live in one of the 25 communities and those who work for the multinational mining corporations or as tourist operators are also involved in the production and reproduction of identities for Nunavut They represent Nunavut for example as a place to live a resource region a wilderness or as a sustainable place Nunavut Government also links these alternative identities to the area

because as a government they are not only interested in protecting Inuit culture but also aim to modernize the economy in order to enhance prosperity and well being As such the place identities are hybrid and identities that before were produced only by external actors are now also being produced by internal actors and vice versa
