Tokes, 2016-01-13 Imaging and Mapping Eastern Europe Katarzyna Murawska-Muthesius, 2021-05-10 Imaging and Mapping Eastern Europe puts images centre stage and argues for the agency of the visual in the construction of Europe's east as a socio political and cultural entity This book probes into the discontinuous processes of mapping the eastern European space and imaging the eastern European body Beginning from the Renaissance maps of Sarmatia Europea it moves onto the images of women in ethnic dress on the pages of travellers reports from the Balkans to cartoons of children bullied by dictators in the satirical press to Cold War cartography and it ends with photos of protesting crowds on contemporary dust jackets Studying the eastern European iconosphere leads to the engagement with issues central for image studies and visual culture word and image relationship overlaps between the codes of othering and self fashioning as well as interaction between the diverse modes of production specific to cartography travel illustrations caricature and book cover design This book will be of interest to scholars in art history visual culture and central Asian Russian and Eastern European studies **The Challenges of Incorporating the Visegrad Countries Into the European Union** Judith A. Wisner, 1994 The fall of communism which swept through Eastern Europe in 1989 brought euphoric energy across the European continent as newspapers splashed moving pictures portraying laughter tears confusion and hope The economic and political landscape was significantly altered and yet it did not seem to matter for change was good Freedom was viewed as opportunity prosperity and finally a chance for peace to mean more than merely the absence of war Five years later the dust has settled the euphoria has waned and the smiles have been replaced by the ever so familiar weathered stone faces of hardship This peaceful revolution removed the daily threat of mutually assured destruction from the European Union's EU 1 door and yet as a community it has been done little to ensure the success of the infant democracies of Eastern Europe EE Recognizing the lack of the EU's initiative to come to their aid Poland Hungary Slovakia and the Czech Republic have each made it a major agenda item for themselves that they become full members of the EU as soon as possible **Eastern Europe** Janelle Rohr, 1990 Presents opposing viewpoints on the division of Europe the effects of recent revolutions in Eastern Europe economic policies Eastern Europe should adopt the impact of German unification and the possibility of a united Europe The 1989 Revolutions in Central and Eastern Europe Kevin McDermott, Matthew Stibbe, 2015-11-01 This important book reassesses a defining historical political and ideological moment in contemporary history the 1989 revolutions in central and eastern Europe Adopting a multi

disciplinary approach the authors reconsider such crucial themes as the broader historical significance of the 1989 events the complex interaction between external and internal factors in the origins and outcomes of the revolutions the impact of the Gorbachev phenomenon the West and the end of the Cold War the political and socio economic determinants of the revolutionary processes in Poland Hungary the German Democratic Republic Czechoslovakia Romania and Bulgaria and the competing academic cultural and ideological perceptions of the year 1989 as communism gave way to post communist pluralism in the 1990s and beyond Concluding that the contentious term revolution is indeed apt for the momentous developments in eastern Europe in 1989 this book will be essential reading for undergraduates postgraduates and specialists alike

**The American Bibliography of Slavic and East European Studies**, 1991 *Eastern Europe, the Soviet Union, and Africa* Chris Saunders, Helder Adegar Fonseca, Lena Dallywater, 2023-04-27 It is now widely recognised that a Cold War perspective falls short in unfolding the complex geographies of connections and the multipolarity of actions and transactions that were shaped through the movement of individuals and ideas from Africa to the East and from the East to Africa in the decades in which African countries moved to independence Adopting an interdisciplinary transregional perspective this volume casts new light on aspects of the role of Eastern Europe and the Soviet Union in the decolonisation of Africa Taking further themes explored in a collection of essays published by the editors in 2019 the twelve case studies by authors from South Africa Czech Republic Portugal Russia Hungary Italy Canada Serbia and Germany draw on new sources to explore the history of the ties that existed between African liberation movements and the socialist bloc some of which continue to influence relationships today Chapters contribute to three relevant main themes that resonate in a number of scholarly fields of inquiry ranging from Global Studies Transregional Studies Cold War Studies Global History to African Studies Eastern European Russian and Slavic Studies Reconsiderations Resources and Reverberations Drawing upon newly opened archives and combining transregional perspectives with sources in different languages chapters explicitly point out the shortcomings of past research and debates in the respective field They highlight new avenues which have been developing and which need to be further developed Reconsiderations Selected case studies address the resources of those being active and involved in decolonisation processes be it in East North West and South They reveal Which resources both material and intellectual are the actors drawing upon On the other hand From which resources are individuals on one side or the other reciprocally or intermittently intentionally kept away Resources Finally the third theme puts an emphasis on the historicity of the processes depicted Studies point to the gaps and dead ends of international support the paths that peter out but also to repercussions and reverberations up until today Reverberations Taken these three themes together the individual chapters contribute to the overall question of Which general historical narratives about the second half of the 20th century are changing based on these new research findings

*Brexit, President Trump, and the Changing Geopolitics of Eastern Europe* Theodor Tudoroiu, 2018-04-05 This book analyzes the combined consequences of Brexit and of the new US foreign policy under

President Trump on the geopolitical situation of Eastern Europe It perceives the evolution of the East European regional security complex as a struggle between the European Union's Kantian win-win geopolitical vision and Russia's neoclassical geopolitics also promoted by President Trump In the most probable scenario the latter approach will have the upper hand The EU's post-Brexit control by the Franco-German axis will likely be followed by the geopolitical irrelevance of the EU due to the renationalization of member states foreign policy with Germany becoming the main West European actor Consequently Eastern Europe will be turned into the arena of a mainly three-cornered neoclassical geopolitics rivalry opposing Russia the Franco-German axis and then Germany and the US in alliance with the post-Brexit UK and certain East European states The book will appeal to scholars across the fields of International Relations Geopolitics European Studies and Area Studies
