Living on the Lake in Prehistoric Europe Francesco Menotti, 2004-08-19 A survey of the history and current state of research on lake dwelling in Europe Timed to mark the 150th anniversary of the beginning of the study of prehistoric lake dwellers

Lake Dwellings After Robert Munro Magdalena S. Midgley, Jeff Sanders, 2012 Dr Robert Munro 1835-1920 was a distinguished medical practitioner who in his later life became a keen archaeologist His particular interests lay in the lake dwelling settlements of his native Scotland known as crannogs as well as those then being discovered across Europe In 1885 Robert Munro undertook a review of all lacustrine research in Europe travelling widely to study collections and visit sites The results of this work formed the basis for the prestigious Rhind Lectures at the Society of Antiquaries of Scotland in 1888 These were then published as *The Lake Dwellings of Europe* a landmark publication for archaeology and one that cemented Munro's archaeological reputation In 1910 Robert Munro offered the University of Edinburgh a financial gift with which to fund lectures in Anthropology and Prehistoric Archaeology Over the past century this has been done through the Munro Trust In 2010 the year of the centenary of the Munro Trust the University of Edinburgh and the Society of Antiquaries of Scotland jointly celebrated the occasion with a gathering of Continental and British scholars The papers presented in this publication are the results of that international seminar This book will engage all those interested in European lake dwellings wetland archaeology and the history of archaeology in the 19th century The collected papers explore the historical context of Munro's work as well as introducing current research from across Europe The book will appeal to both the professional and the interested amateur of which Munro himself represented such an exciting synthesis

The Dynamics and Use of Lacustrine Ecosystems V. Ilmavirta, R.I. Jones, 2012-12-06 Limnology is increasingly concerned with water supply and the relation of man to aquatic environments Without the continued availability of pure water all progress in technology and other fields of human life will be to no avail The global problems concerning clear water are already extremely pressing More limnology knowledge is needed to solve these problems The responsibility of man to save water and to take more intensive care of the environment is raised in many of the papers in this book This emphasizes the necessary and unquestionable relevance of limnology to human society Too often the abuse of water usage reflects the neglect of scientific results Limnologists have a responsibility to ensure that administrators understand what is going on The coverage of the book is wide including papers on microbiology to engineering sciences The biology of waters is handled at both species and ecosystem levels The geographical distribution of topics ranges from the tropics to northern temperate areas In fact limnology is increasingly becoming a science which is rightly relevant to everyday life not just an academic subject
