## **Deregulating Telecoms:**

**Deregulating Telecoms** Jill Hills, 1986-09-23 *Deregulating Telecommunications* Kevin G. Wilson, 2000 This volume critically examines the transition from monopoly to competition in the U S and Canadian telecommunications industries it looks at the history of the telephone industry its regulation and over a century of related public policy The

Telecommunications Revolution in Korea James F. Larson, 1995 The first English language work on Korea s unique experiences with telecommunications this book focuses on Korea s distinct political economic legal socio cultural and personal dimensions It includes chapters on the relationship between political liberalization and telecommunications education and public promotion of the information society together with the role of new technologies in the reunification of Korea **The Irony of Regulatory Reform** Robert Britt Horwitz, 1989 This study examines the history of

telecommunications both telephone and broadcast with particular reference to attempts to regulate these media in the USA

**Telecommunications Deregulation and Competition in the Philippines, 1993-1996** Maria Catherine Advincula Obien, 1998 Privatization and Deregulation in ASEAN and the EC Institute of Southeast Asian Studies, 1990 This volume

has 18 papers on the theoretical and practical aspects of privatization and deregulation in the sectors of public utilities telecommunications and public transport and on the implications of these policies for the capital market and industrial relations *The Political Economy of Communications* Kenneth Dyson, Peter Humphreys, 2023-10-20 First published in 1990 The Political Economy of Communications explores the central theme of the relationship between politics and markets in policy development The contributors show how governments have been drawn into increasing interdependency by technological and market developments with international institutions like the European Community becoming more important in these policy areas They argue that neither government ideologies nor market and technological forces offer an adequate account of the processes of change in communications policy These conclusions lead to a critique of central theories of international political economy notably neo liberalism and the authors advocate instead a neo pluralist perspective for the study of political economy of communications an approach that takes institutions much more seriously as a central unit of analysis The book will be of interest to students of international relations European studies and media and telecommunication studies as well as to political scientists and economists concerned with public policy Governing Global

Networks Mark W. Zacher, Brent A. Sutton, 1996 *Governing Global Networks* argues that most international regimes are grounded in states mutual cooperation and not in the dictates of the most powerful states It focuses on the regimes for four important international industries shipping air transport telecommunications and postal services Of particular importance to these regimes have been states interests in both the free flow of commerce and their policy autonomy The authors examine the relationship between these potentially conflicting goals In particular they trace the impact of deregulation which has led some states increasingly to place gains from economic openness ahead of their desire to maintain a high degree of control of

their own economies and to the decline of the traditional cartel elements of these regimes This analysis is an important contribution to theoretical debates between neo realists and neo liberals in the study of international organisations and international political economy *Telecommunications and Empire* Jill Hills,2023-12-11 Jill Hills picks up from her pathbreaking study *The Struggle for Control of Global Communication The Formative Century* to continue her examination of the political technological and economic forces at work in the global telecommunications market from World War II to the World Trade Organization agreement of 1997 In the late twentieth century focus shifted from the creation and development of global communication markets to their intense regulation The historical framework behind this control where the market was regulated by what institution controlled by what power and to whose benefit masterfully complements Hills s analysis of power relations within the global communications arena Hills documents attempts by governments to direct replace and bypass international telecommunications institutions As she shows the results have offered indirect control over foreign domestic markets government management of private corporations and government protection of its own domestic communication market Hills reveals that the motivation behind these powerful regulatory efforts on person to person communication lies in the unmatched importance of communication in the world economy As ownership of communications infrastructure becomes more valuable governments have scrambled to shape international guidelines Hills provides insight into struggles between U S policymakers and the rest of the world illustrating the conflict between a growing telecommunications empire and sovereign states that are free to implement policy changes Freshly detailing the interplay between U S federal regulation and economic power Hills fosters a deep understanding of contemporary systems of power in global communications

**Visions of a Digital Nation** Jacob Ward,2024-02-06 Why the privatization of British Telecom signaled a pivotal moment in the rise of neoliberalism and how it was shaped by the longer development and digitalization of Britain s telecommunications infrastructure When Margaret Thatcher sold British Telecom for 3 6 billion in 1984 it became not only at the time the largest stock flotation in history but also a watershed moment in the rise of neoliberalism and deregulation In *Visions of a Digital Nation* Jacob Ward offers an incisive interdisciplinary perspective on how technology prefigured this pivot Giving due consideration to the politicians engineers and managers who paved the way for this historic moment Ward illustrates how the decision validated the privatization of public utilities and tied digital technology to free market rationales In this examination of the national and at times global history of technology Ward s approach is sweeping Utilizing infrastructure studies environmental history and urban and local history Ward explores Britain s nationalist and welfarist plans for a digital information utility and shows how these projects contested and adapted to the market turn under Margaret Thatcher Ultimately *Visions of a Digital Nation* compellingly argues that politicians did not impose neoliberalism top down but that technology engineers and managers shaped these politics from the bottom up

**Building Telecom Markets** Whasun Jho,2003 *The Deregulation of International Telecommunications* Ronald S. Eward,1985

*Competition and Deregulation in Telecommunications* Thomas James Duesterberg, Kenneth Gordon, 1997 According to this book the anticipated benefits of the Telecommunications Act of 1996 are proving elusive as competition has been slow to rise and government agencies have been slow to implement the deregulation and market opening processes specified in the new law The authors argue that the pace of innovation and the telecom industry's demonstrated capacity to restructure itself efficiently show that the benefits of competition far outweigh the costs of trying to micromanage the industry through regulation

**The Political Economy of Telecommunication Reform in Developing Countries** Ben A. Petrazzini, 1993

**Telecommunications Rate Deregulation in Nebraska** Milton Mueller, 1992      **Telecommunications Transformed** Melissa Barros, 1999      **Divestiture and Telecommunications Deregulation** California. Legislature. Assembly. Committee on Utilities and Commerce, 1985      *Deregulation of Entry in Long-distance Telecommunications* Paul W. MacAvoy, 2002      Telecom Reform William H. Melody, 1997 Analiza El propósito y la experiencia de la regulación Nuevas tecnologías redes y mercados Gestión de recursos públicos Eficiencia equidad y protección del consumidor Herramientas básicas de regulación Aspectos especiales que afectan a los países en vías de desarrollo Cuestiones futuras sobre redes inteligentes y comercio electrónico
