An Economic Assessment of Surface Freight Transportation Deregulation (Classic Reprint) Nancy L. Rose, 2015-07-06 Excerpt from An Economic Assessment of Surface Freight Transportation Deregulation Regulatory reforms during the late 1970 and early 1980s dramatically transformed the structure and performance of the U S surface freight transportation industry After four decades of gradual decline the number of firms in the interstate trucking industry exploded increasing from 16 000 in 1975 to more than 33 000 in 1985 Real trucking rates fell nearly 20 percent over the same period Deregulation of the rail industry led to mergers and consolidations that have slashed the number of large Class I carriers from 73 in 1975 to 26 in 1985 At the same time that real average revenue per ton mile declined by 21 percent real net railway operating income rose by over 160 percent The structural and performance changes associated with transport deregulation generated substantial redistributions of wealth among carriers labor shippers and final customers and dramatically altered the costs and organization of transportation services Many of these consequences were anticipated in the debate over deregulation others have emerged during the regulatory transition In general economic deregulation has led to net social benefits However three issues motor carrier safety railroad pricing for captive shippers and increased concentration in both industries have attracted growing public attention and raised questions about the desirability of competitive transportation industries This study surveys the current state of the U S trucking and railroad industries and discusses developments that may merit policy attention About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art

Transportation Labor Issues and Regulatory Reform James Peoples, Wayne K Talley, 2004-11-08 Regulatory reform in the late 1970s and early 1980s vastly transformed the labor market for transportation workers Most research in this area focuses on the effect of deregulation on the earnings of nonmanagement company workers in airline trucking and rail Deregulation of transportation industries though has had a broader effect on workers For instance deregulation also influences workers hours worked per week working conditions worker safety and a host of other labor issues Deregulation might also influence the earnings of managers and self employed workers in transportation industries Examining these issues is valuable because such analysis provides a more complete assessment of labor market changes following the shift to a more market oriented business environment *Transportation Labor Issues and Regulatory Reform* adds to the debate on deregulation s influence on transportation labor markets by presenting empirical evidence on an array of labor market outcomes in transportation industries Contributions to this volume are categorized by their analysis on worker safety working conditions and employment opportunities and by their analysis on managerial and self employed earnings
