Doomsday The Science Of Catastrophe:

Doomsday Fred Warshofsky,1979 **Doomsday** Antony Milne,2000-01-30 Milne provides a concise review of catastrophism in its historical cosmic scientific and earth shattering sense Within this one volume a wide range of up to date scientific facts and concepts are reviewed and chronicle with dates and places marking the end of a turbulent 2 000 years

Catastrophe Richard A. Posner,2004-11-11 Catastrophic risks are much greater than is commonly appreciated Collision with an asteroid runaway global warming voraciously replicating nanomachines a pandemic of gene spliced smallpox launched by bioterrorists and a world ending accident in a high energy particle accelerator are among the possible extinction events that are sufficiently likely to warrant careful study How should we respond to events that for a variety of psychological and cultural reasons we find it hard to wrap our minds around Posner argues that realism about science and scientists innovative applications of cost benefit analysis a scientifically literate legal profession unprecedented international cooperation and a pragmatic attitude toward civil liberties are among the keys to coping effectively with the catastrophic risks

Catastrophes Nitzan Lebovic,Andreas Killen,2014-04-01 Catastrophic scenarios dominate our contemporary mindset Catastrophic events and predictions have spurred new interest in re examining the history of earlier disasters and the social and conceptual resources they have mobilized The essays gathered in this volume reconsider the history and theory of different catastrophes and their aftermath The emphasis is on the need to distance this process of reconsideration from previous teleological representations of catastrophes as an endpoint and to begin considering their operative aspects which unmask the nature of social and political structures Among the essays in this volume are analyses by leading scholars in their respective fields concerning the role of catastrophes in theology in the history of industrial accidents in theory of history in the history of law in catastrophe films in the history of cybernetics in post Holocaust discussions of reparations and in climate change

Apocalyptic Fever Richard G. Kyle,2012-08-01 How will the world end Doomsday ideas in Western history have been both persistent and adaptable peaking at various times including in modern America Public opinion polls indicate that a substantial number of Americans look for the return of Christ or some catastrophic event The views expressed in these polls have been reinforced by the market process Whether through purchasing paperbacks or watching television programs millions of Americans have expressed an interest in end time events Americans have a tremendous appetite for prophecy more than nearly any other people in the modern world Why do Americans love doomsday In *Apocalyptic Fever* Richard Kyle attempts to answer this question showing how dispensational premillennialism has been the driving force behind doomsday ideas Yet while several chapters are devoted to this topic this book covers much more It surveys end time views in modern America from a wide range of perspectives dispensationalism Catholicism science fringe religions the occult fiction the year 2000 Islam politics the Mayan calendar and more *American Book Publishing Record* ,2000 *Natural Catastrophes During Bronze Age Civilisations* Benny Josef Peiser,Trevor Palmer,M.
