**Architectural Space in Ancient Greece** C. A. Doxiadis,1972      **Architectural Space in Ancient Greece**

Constantinos Apostolou Doxiadis, Kōnstantinos A. Doxiadēs, 1972-01 Doxiadis is best known as an architect planner as a consultant with an international clientele as something of a prophet whose outlook is focused on man's worldwide future. But here in his first major study originally published in German in 1937 Doxiadis looks back into the past to the architectural roots of his native Greece. He works out a theory that accounts for the seemingly unordered layout of the buildings in ancient Greek sacred precincts proposing that the spatial relationships between the buildings were strictly determined according to a plan. Doxiadis examines in detail nearly thirty sites, charts their layouts, and presents relevant linear and angular measurements. Numerous site plans and about forty halftones complement the text. The full references include many recent sources. The trim size of the book itself is proportioned by means of the golden section.

**Architectural Space in Ancient Greece** C. A. Doxiadis, 1978      [Perspectives on Public Space in Rome, from Antiquity to the Present Day](#) Jan Gadeyne, 2016-04-22 This volume provides readers interested in urban history with a collection of essays on the evolution of public space in that paradigmatic western city which is Rome. Scholars specialized in different historical periods contributed chapters in order to find common themes which weave their way through one of the most complex urban histories of western civilization. Divided into five chronological sections: Antiquity, Middle Ages, Renaissance, Baroque, Modern and Contemporary, the volume opens with the issue of how public space was defined in classical Roman law and how ancient city managers organized the maintenance of these spaces before moving on to explore how this legacy was redefined and reinterpreted during the Middle Ages. The third group of essays examines how the imposition of papal order on feuding families during the Renaissance helped introduce a new urban plan which could satisfy both functional and symbolic needs. The fourth section shows how modern Rome continued to express strong interest in the control and management of public space, the definition of which was necessarily selective in this vastly extensive city. The collection ends with an essay on the contemporary debate for revitalizing Rome's eastern periphery. Through this long-term chronological approach, the volume offers a truly unique insight into the urban development of one of Europe's most important cities and concludes with a discussion of the challenges public space faces today after having served for so many centuries as a driving force in urban history.

**The Place of the Viewer** Kerr Houston, 2019-05-07 In recent decades art historians and critics have occasionally emphasized a dynamic embodied mode of looking, accenting the role of the viewer and the complex interplay between beholders and works of art. In *The Place of the Viewer*, Kerr Houston shows that an attention to the position and physical experiences of beholders has, in fact, long informed art historical analyses and that close study of the theme can lead to a fuller understanding of the discipline, the act of viewership, and individual works of art.

Simultaneously attentive to historical ideas and contemporary scholarship this book identifies a vein of thought that has been generally overlooked and proposes new ways of seeing familiar works and traditions

**I Am a Monument** Aron Vinegar,2008 Learning from Las Vegas originally published by the MIT Press in 1972 was one of the most influential and controversial architectural books of its era Thirty five years later it remains a perennial bestseller and a definitive theoretical text Its authors architects Robert Venturi Denise Scott Brown and Steven Izenour famously used the Las Vegas Strip to argue the virtues of the ordinary and ugly above the heroic and original qualities of architectural modernism Learning from Las Vegas not only moved architecture to the center of cultural debates it changed our ideas about what architecture was and could be In this provocative rereading of an iconic text Aron Vinegar argues that Learning from Las Vegas is not only of historical interest but of absolute relevance to current critical debates in architectural and visual culture Vinegar argues that to read Learning from Las Vegas only as an exemplary postmodernist text to understand it for example as a call for pastiche or as ironic provocation is to underestimate its deeper critical and ethical meaning and to miss the underlying dialectic between skepticism and the ordinary expression and the deadpan that runs through the text Vinegar s close attention to the graphic design of Learning from Las Vegas and his fresh interpretations of now canonical images from the book such as the Duck the Decorated Shed and the recommendation for a monument make his book unique Perhaps most revealing is his close analysis of the differences between the first 1972 edition designed for the MIT Press by Muriel Cooper and the revised edition of 1977 which was radically stripped down and largely redesigned by Denise Scott Brown The dialogue between the two editions continues with this book where for the first time the two versions of Learning from Las Vegas are read comparatively Publisher s website

**Montage and the Metropolis** Martino Stierli,2018-01-01 Montage has been hailed as one of the key structural principles of modernity yet its importance to the history of modern thought about cities and their architecture has never been adequately explored In this groundbreaking new work Martino Stierli charts the history of montage in late 19th century urban and architectural contexts its application by the early 20th century avant

gardes and its eventual appropriation in the postmodern period With chapters focusing on photomontage the film theories of Sergei Eisenstein Mies van der Rohe s spatial experiments and Rem Koolhaas s use of literary montage in his seminal manifesto *Delirious New York* 1978 Stierli demonstrates the centrality of montage in modern explorations of space and in conceiving and representing the contemporary city Beautifully illustrated this interdisciplinary book looks at architecture photography film literature and visual culture featuring works by artists and architects including Mies Koolhaas Paul Citroen George Grosz Hannah Hoch El Lissitzky and Le Corbusier *The Method for the Study of the Ancient Greek Settlements* Kōnstantinos Apostolou Doxiadēs,1972 **From Doxiadis' Theory to Pikionis' Work** Kostas Tsiambaos,2017-09-22 In this book Tsiambaos redefines the ground breaking theory of Greek architect and town planner Constantinos A Doxiadis *The Form of Space in Ancient Greece* and moves his thesis away from antiquity and ancient architecture instead arguing that it can only be understood as a theory founded in modernity In light of this the author explores Doxiadis theory in relation to the work of the controversial Greek architect Dimitris Pikionis This parallel investigation of the philosophical content of Doxiadis theory and the design principles of Pikionis work establishes a new frame of reference and creates a valuable and original interpretation of their work Using innovative cross disciplinary tools and methods which expand the historical boundaries of interwar modernism the book restructures the ground of an alternative modernity that looks towards the future through a mirror that reflects the ancient past *From Doxiadis Theory to Pikionis Work Reflections of Antiquity in Modern Architecture* is fascinating reading for all scholars and students with an interest in modernism and antiquity the history and theory of architecture the history of ideas and aesthetics or town planning theory and design *Palaces and Large Residences of the Hellenistic Age* Bonnie Lea Kutbay,1998 Synthetic examination of the architectural material clarifying the nature of palaces and large identifying architectural forms most commonly found and examining their sources With illustrations **The Archaeology of Aphrodite in the Greek West** Rebecca Karina Schindler,1998 [Readings in Art History: Ancient Egypt through the Middle Ages.](#) *Egyptian art* Harold Spencer,1982 *History of Architecture* Dora P. Crouch,1985 **Architectural Handbook** Alfred M. Kemper,1979 [History and Precedent in Environmental Design](#) Amos Rapoport,1990-07-31 This book is about a new and different way of approaching and studying the history of the built environment and the use of historical precedents in design However although what I am proposing is new for what is currently called architectural history both my approach and even my conclusions are not that new in other fields as I discovered when I attempted to find supporting evidence In fact of all the disciplines dealing with various aspects of the study of the past architectural history seems to have changed least in the ways I am advocating There is currently a revival of interest in the history of architecture and urban form a similar interest applies to theory vernacular design and culture environment relations After years of neglect the study of history and the use of historical precedent are again becoming important However that interest has not led to new approaches to the subject nor have its bases been examined This I try to

do In so doing I discuss a more rigorous and I would argue a more valid way of looking at historical data and hence of using such data in a theory of the built environment and as precedent in environmental design Underlying this is my view of Environment Behavior Studies CEBS as an emerging theory rather than as data to help design based on current theory Although this will be the subject of another book a summary statement of this position may be useful *The Architecture of the White Chapel of Senuseret I* Jeffrey Christopher Burden,1992 *Handbook of Practical Geometry* Bob Greenberg,1982
