*Double Dealing III: The Pun* Chuck Closson, 2013-05-07 The Pun is Older than Punctuation The start and use of punctuation occurred around 1500 AD Prior to this no commas periods quotation marks etc were used in writing What one doesn't have one learns to do without Books then were rare no printing presses Somewhere in those early years someone decided interpretative marks were needed to enhance writing Yet puns were employed much earlier In the New Testament Matthew 16:18 Jesus is quoted as having said You are Peter on this rock I will build my Church The word Peter in that ancient language translates as rock In effect a pun Another early pun the headless horseman wore an unusual necklace A young St Augustine prayed Lord make me pure but not yet Someone punned him as being a roaming Catholic Puns are inferential they twist together meanings and entwine connections to enhance incongruity No ifs ands or butts Just a few months ago the White House and Congress faced the Fiscal Cliff After weeks of back and forth wrangling only a few hours remained before going over the cliff to higher taxes Expressing her disfavor toward a do nothing Congress House Minority Leader Nancy Pelosi said punningly Congress it's all about time it's about time

*Customer Fraud and Business Responses* Kelly T. Tian, Bill Keep, 2001-12-30 From remarkably frank and credible responses to their comprehensive research questionnaire Tian and Keep provide a unique wide ranging catalogue of frauds that customers perpetrate on businesses and what marketers can do to combat it They were able to receive and analyze more than 250 written descriptions a 71% response rate of the acts that customers committed and the methods they used Instead of merely a checklist Tian and Keep obtained their data in the customers own words resulting in highly detailed and reliable insights into why customers did what they did They find that customer fraud has emerged as a form of guerilla warfare against companies that it is adapted to specific situations and that underlying customers motivation is a need to get even Ethics has little to do with it In fact some respondents even asserted that they had an obligation to commit fraud they did it to retaliate against what they perceived as unethical acts that businesses committed against them The result is a rare documentation of the specifics of fraud how it threatens not only business but entire economies and the actions bold and subtle that marketers can take in self protective response Not only will corporate management particularly in marketing get detailed descriptions of their customers fraud strategies and tactics but they will also receive insights into where they are vulnerable and why Tian and Keep show that fraud has become so socially acceptable among middle class customers that they are willing to share their tactics strategies and secrets with their friends With this as their foundation the authors give practitioners an arsenal of detection and deterrence methods Equally important they provide ways to implement them without alienating their other blameless customers They also show marketers what they can do to reestablish trust in their marketing exchanges with customers and improve relationships in ways that will diminish if not fully eliminate the incidence of fraud For management generally as well as marketers in companies of all sizes and type Tian's and Keep's book is essential engrossing and useful reading
