The Startup Community Way Brad Feld, Ian Hathaway, 2020-08-03 The Way Forward for Entrepreneurship Around the World We are in the midst of a startup revolution The growth and proliferation of innovation driven startup activity is profound unprecedented and global in scope Today it is understood that communities of support and knowledge sharing go along with other resources The importance of collaboration and a long term commitment has gained wider acceptance These principles are adopted in many startup communities throughout the world And yet much more work is needed Startup activity is highly concentrated in large cities Governments and other actors such as large corporations and universities are not collaborating with each other nor with entrepreneurs as well as they could Too often these actors try to control activity or impose their view from the top down rather than supporting an environment that is led from the bottom up We continue to see a disconnect between an entrepreneurial mindset and that of many actors who wish to engage with and support entrepreneurship There are structural reasons for this but we can overcome many of these obstacles with appropriate focus and sustained practice No one tells this story better than Brad Feld and Ian Hathaway The Startup Community Way Evolving an Entrepreneurial Ecosystem explores what makes startup communities thrive and how to improve collaboration in these rapidly evolving complex environments The Startup Community Way is an explanatory guide for startup communities Rooted in the theory of complex systems this book establishes the systemic properties of entrepreneurial ecosystems and explains why their complex nature leads people to make predictable mistakes As complex systems value creation occurs in startup communities primarily through the interaction of the parts the people organizations resources and conditions involved not the parts themselves This continual process of bottom up interactions unfolds naturally producing value in novel and unexpected ways Through these complex emergent processes the whole becomes greater and substantially different than what the parts alone could produce Because of this participants must take a fundamentally different approach than is common in much of our civic and professional lives Participants must take a whole system view rather than simply trying to optimize their individual part They must prioritize experimentation and learning over planning and execution Complex systems are uncertain and unpredictable They cannot be

controlled only guided and influenced Each startup community is unique Replication is enticing but impossible The race to become The Next Silicon Valley is futile even Silicon Valley couldn't recreate itself This book Offers practical advice for entrepreneurs community builders government officials and other stakeholders who want to harness the power of entrepreneurship in their city Describes the core components of startup communities and entrepreneurial ecosystems as well as an explanation of the differences between these two related but distinct concepts Advances a new framework for effective startup community building based on the theory of complex systems and insights from systems thinking Includes contributions from leading entrepreneurial voices Is a must have resource for entrepreneurs venture capitalists executives business and community leaders economic development authorities policymakers university officials and anyone wishing to understand how startup communities work anywhere in the world
