Abstract

At the Regional Radio communication Conference of ITU which took place in June 2006 in Geneva, Switzerland, participants unanimously endorsed a motion for broadcast stations to migrate from analogue to digital broadcasting with deadlines of June 17, 2015, and June 17, 2020, for countries using frequency bands such as VHF. In a bid to fully comply before the ITU deadlines, Nigeria had set 3 unsuccessful deadlines for herself. It first of all set June 17, 2012, which it failed to actualize. The date was extended to December 31, 2012, without success, while a further extension to January 1, 2015, could not equally herald the intended success. Sequel to these failures, the critical question that demand urgent response is, what are the specific factors that have continued to hinder Nigeria's transition to digital broadcasting? On this premise, the researchers(using the intensive interview research method as well as a review of relevant empirical studies), aim to critically unveil and explicate the various factors impeding the successful migration from analogue to digital television broadcasting in Nigeria, this is with a cardinal intention of advancing well thought-out recommendations that will ensure successful transition.
