Specifications for Building Conservation Rory

Cullen, Rick Meier, 2017-09-19 In Specifications for Building Conservation the National Trust draws on a range of case studies

and specifications to provide a much needed guide to specification writing for building conservation Although traditional

building accounts for approximately a quarter of all buildings in the UK the old skills and understanding required for their

care and maintenance have been increasingly eroded over the last century As the largest heritage charity in Europe the

National Trust has a first class reputation for high standards of conservation and care and in this three volume set the Trust

brings together a remarkable pool of expertise to guide conservation professionals and students through the process of

successful specification writing This first book focusses on the materials used for the external fabric detailing successful

approaches employed by the National Trust at some of their most culturally significant sites A range of studies have been

carefully selected for their interest diversity and practicality showcasing projects from stonework repairs on the magnificent

Grade I listed Hardwick Hall to the re thatching of the traditional cottages of the Holnicote Estate Complete with a practical

Conservation Management Plan checklist this book will enable practitioners to develop their skills allowing them to make

informed decisions when working on a range of project types This is the first practical guide to specification writing for

building conservation and the advice provided by the National Trust experts will be of interest to any practitioners and

students involved in building conservation both in the UK and beyond Profits generated from the sale of this publication will

go to the National Trust Building Apprenticeship Scheme This provides placements for traditional skills at National Trust

properties Scotch Baronial Miles Glendinning, Aonghus MacKechnie, 2019-01-10 As the debate about Scottish

independence rages on this book takes a timely look at how Scotland s politics have been expressed in its buildings exploring

how the architecture of Scotland in particular the constantly changing ideal of the castle has been of great consequence to

the ongoing narrative of Scottish national identity Scotch Baronial provides a politically framed examination of Scotland s

kaleidoscopic castle architecture tracing how it was used to serve successive political agendas both prior to and during the

three unionist centuries from the early 17th century to the 20th century The book encompasses many of the country s most

important historic buildings from the palaces left behind by the lost monarchy to revivalist castles and the proud town halls of the Victorian age examining their architectural styles and tracing their wildly fluctuating political and national connotations It ends by bringing the story into the 21st century exploring how contemporary neo modernist architecture in today s Scotland as exemplified in the Holyrood parliament relates to concepts of national identity in architecture over the previous centuries *Scottish Vernacular Building: A listing of books and articles of relevance, mostly published 1964-1986* Leslie J. W. Fraser,1987 **Building** ,1900 **British Builder** ,1923 The Housing of the working people United States. Bureau of Labor,1895 Survey and Assessment of Traditionally Constructed Brickwork Moses Jenkins,2022-03-28 The principal aim of this book is to improve the practice of surveying traditionally constructed brickwork It aims to ensure that those who have a cause to survey buildings constructed of traditional pre 1919 brickwork have a well developed clear methodology for undertaking effective comprehensive surveys The book will help readers gain the proper level of knowledge expertise and skill to be able to survey these buildings correctly to recognise not just defects within the brickwork itself but also crucially the cause of these defects Experienced author Moses Jenkins presents a clear and concise methodology for the survey of brickwork in existing buildings with coverage including identifying repair needs understanding the cause of decay within brickwork ascertaining the age and significance of traditionally constructed brickwork and identifying significant technical and decorative features Despite the extensive use of traditionally constructed brick worldwide the knowledge and expertise to properly survey buildings of this type has not to date been laid out in a reliable and methodical way This book addresses this deficiency and provides an invaluable resource to all those who survey and assess buildings constructed of brickwork This includes building professionals such as architects surveyors engineers and those working in building conservation but also construction managers and students studying built environment disciplines *The Story of Scotland's Towns* Robert J. Naismith,1989 **A Catalogue of Selected Atlases, Maps, Diagrams, Books, &c. Published Or Sold by Edward Stanford, [1874?]** ,1874 Special Reports of the Commissioner of Labor [for the Years] ...
