Collective Intelligence:

Handbook of Collective Intelligence Thomas W. Malone, Michael S. Bernstein, 2015-11-13 Experts describe the latest research in a rapidly growing multidisciplinary field the study of groups of individuals acting collectively in ways that seem intelligent Intelligence does not arise only in individual brains it also arises in groups of individuals This is collective intelligence groups of individuals acting collectively in ways that seem intelligent In recent years a new kind of collective intelligence has emerged interconnected groups of people and computers collectively doing intelligent things Today these groups are engaged in tasks that range from writing software to predicting the results of presidential elections This volume reports on the latest research in the study of collective intelligence laying out a shared set of research challenges from a variety of disciplinary and methodological perspectives Taken together these essays by leading researchers from such fields as computer science biology economics and psychology lay the foundation for a new multidisciplinary field Each essay describes the work on collective intelligence in a particular discipline for example economics and the study of markets biology and research on emergent behavior in ant colonies human computer interaction and artificial intelligence and cognitive psychology and the wisdom of crowds effect Other areas in social science covered include social psychology organizational theory law and communications Contributors Eytan Adar Ishani Aggarwal Yochai Benkler Michael S Bernstein Jeffrey P Bigham Jonathan Bragg Deborah M Gordon Benjamin Mako Hill Christopher H Lin Andrew W Lo Thomas W Malone Mausam Brent Miller Aaron Shaw Mark Steyvers Daniel S Weld Anita Williams Woolley *Collective Intelligence* Pierre Levy, 1997-08-21 The number of travelers along the information superhighway is increasing at a rate of ten percent a month How will this communications revolution affect our culture and society Pierre Levy believes that rather than creating a society where machines rule man the technology of cyberspace will have a humanizing influence on us and foster the emergence of a collective intelligence a meeting of minds on the Internet that will validate the contributions of the individual With a depth of scholarship and imaginative insight rare among media critics Levy demonstrates how the unfettered exchange of ideas in cyberspace has the potential to liberate us from the social and political hierarchies that have stood in the way of mankind s advancement At once a profound historical analysis of the development of human culture and a blueprint for the future **Collective Intelligence** is a visionary work that will make a substantial contribution to our views on society through to the next millennium **Collective Intelligence in Action** Satnam Alag, 2008-09-30 There s a great deal of wisdom in a crowd but how do you listen to a thousand people talking at once Identifying the wants needs and knowledge of internet users can be like listening to a mob In the Web 2 0 era leveraging the collective power of user contributions interactions and feedback is the key to market dominance A new category of powerful programming techniques lets you discover the patterns inter relationships and individual profiles the collective intelligence locked in the data people leave behind as they surf websites post blogs and interact with other users **Collective Intelligence in Action** is a hands on

guidebook for implementing collective intelligence concepts using Java It is the first Java based book to emphasize the underlying algorithms and technical implementation of vital data gathering and mining techniques like analyzing trends discovering relationships and making predictions It provides a pragmatic approach to personalization by combining content based analysis with collaborative approaches This book is for Java developers implementing Collective Intelligence in real high use applications Following a running example in which you harvest and use information from blogs you learn to develop software that you can embed in your own applications The code examples are immediately reusable and give the Java developer a working collective intelligence toolkit Along the way you work with a number of APIs and open source toolkits including text analysis and search using Lucene web crawling using Nutch and applying machine learning algorithms using WEKA and the Java Data Mining JDM standard Purchase of the print book comes with an offer of a free PDF ePub and Kindle eBook from Manning Also available is all code from the book

The ^AOxford Handbook of Group and Organizational Learning Linda Argote, John M. Levine, 2020-01-02 Groups and organizations vary dramatically in their ability to learn Some acquire substantial knowledge as a function of experience while others do not Failing to learn from experience can have significant consequences for organizations and their members The goal of this handbook is to bring together cutting edge theoretical and empirical work on group and organizational learning by leading scholars from several disciplines The handbook advances understanding of the causes and consequences of learning in collectives of varying size and complexity The handbook provides insights about how to overcome barriers to learning in groups and organizations and thereby to improve their performance

Collective Intelligence in Computer-Based Collaboration John B. Smith, 1994-08-01 Proposing a new paradigm for Computer Supported Cooperative Work CSCW this ground breaking book presents a research agenda for developing and testing that paradigm It constitutes the first attempt to outline a comprehensive model of collaboration that integrates the cognitive conceptual and social dynamics of groups The challenge faced by all groups

engaged in intellectual work is on the one hand to divide the task so that efforts of individual members may proceed in parallel and on the other hand to synthesize their separate contributions to form a coherent whole Addressing this challenge Smith examines the general form of a theory of computer based collaboration that extends across different tasks and working situations He uses the work of Newell Simon and Anderson as a base from which to consider a group as a form of distributed information processing system Within groups there are constructs analogous to human long term and short term memory conceptual processes and problem solving and knowledge construction strategies He discusses two metacognitive issues awareness and control as they occur in collaborative behavior And he reviews a number of advanced computer systems that support collaboration focusing on their impact on the thinking and behavior of groups Smith s theoretical framework combines elements of Information Processing System theory and its detailed process models of cognitive behavior with the situated perspective of activity theory The book suggests new and useful ways of conceiving problems and solutions to all those interested in the ways in which people interact with each other and with computers to achieve goals

Democratic Reason Hélène Landemore, 2013 Individual decision making can often be wrong due to misinformation impulses or biases Collective decision making on the other hand can be surprisingly accurate In *Democratic Reason* Hélène Landemore demonstrates that the very factors behind the superiority of collective decision making add up to a strong case for democracy She shows that the processes and procedures of democratic decision making form a cognitive system that ensures that decisions taken by the many are more likely to be right than decisions taken by the few Democracy as a form of government is therefore valuable not only because it is legitimate and just but also because it is smart Landemore considers how the argument plays out with respect to two main mechanisms of democratic politics inclusive deliberation and majority rule In deliberative settings the truth tracking properties of deliberation are enhanced more by inclusiveness than by individual competence Landemore explores this idea in the contexts of representative democracy and the selection of representatives She also discusses several models for the wisdom of crowds channeled by majority rule examining the trade offs between inclusiveness and individual competence in voting When inclusive deliberation and majority rule are combined they beat less inclusive methods in which one person or a small group decide *Democratic Reason* thus establishes the superiority of democracy as a way of making decisions for the common good

Big Mind Geoff Mulgan, 2018 A new field of collective intelligence has emerged in the last few years prompted by a wave of digital technologies that make it possible for organizations and societies to think at large scale This bigger mind human and machine capabilities working together has the potential to solve the great challenges of our time So why do smart technologies not automatically lead to smart results Gathering insights from diverse fields including philosophy computer science and biology Big Mind reveals how collective intelligence can guide corporations governments universities and societies to make the most of human brains and digital technologies Geoff Mulgan explores how collective intelligence has to be consciously organized and orchestrated in order to harness its powers He looks at

recent experiments mobilizing millions of people to solve problems and at groundbreaking technology like Google Maps and Dove satellites He also considers why organizations full of smart people and machines can make foolish mistakes from investment banks losing billions to intelligence agencies misjudging geopolitical events and shows how to avoid them Highlighting differences between environments that stimulate intelligence and those that blunt it Mulgan shows how human and machine intelligence could solve challenges in business climate change democracy and public health But for that to happen we ll need radically new professions institutions and ways of thinking Informed by the latest work on data web platforms and artificial intelligence Big Mind shows how collective intelligence could help us survive and thrive *World Yearbook of Education 2004* Andrew Brown,Niki Davis,2013-04-15 A real revolution is taking place in the way in which we conceptualise and practise education and learning This book sets out to explore the immense impact which digital technology is having on education around the world and the ways in which it is used by a wide range of individuals and communities Contributors analyse changes in technology such as e mail the Internet digital video and other media but also the effect of this new technology on the way people live and learn around the world Cultural changes taking place range from the blurring of boundaries between formal and informal learning to the development of new virtual communities which revolve around particular social or cultural interests and which serve as a crucial tool and source of identity for spatially displaced communities such as refugees Digital technology is changing the way we all live and this book is an authoritative study of these changes in all their diversity **Developing Collective Intelligence** Philippe Labat,2021-04-04 How to use group dynamics to make the right decisions Organizations evolve in a context of change uncertainty and complexity Employees need to understand what is at stake and to participate in decisions However if managers and leaders need to mobilize collective intelligence to succeed they have little or no training in working in large groups Collaborative design is a development process involving stakeholders Workshops led by facilitators from within the company or from external firms take place during seminars lasting one or more days In a complex situation such as a merger the reframing of a project a business choice the launch of a product the development of an organization or the implementation of a strategy they bring together from fifteen to more than one hundred and fifty participants around an objective to analyze the situation to find out how to deal with and solve a problem to produce shared representations or decisions and to commit to action This book is based on the author s proven practices It will help executives and managers co design and co facilitate these workshops so that they produce tangible results Very concrete it is illustrated with various cases such as a large aeronautical company a research laboratory an industrial SME a professional group a cooperative or a school After an introduction on collaborative design it is organized into four parts 1 Understanding imagining and giving meaning 2 Planning projecting and giving substance 3 Expanding improvising and giving rhythm 4 Planting growing and sustaining life Each of the twenty seven practical sections can be approached independently thanks to a common plan issues keys and examples The book is prefaced
