I. Introduction & Overview

- 1. Document Purpose:** This document serves as a comprehensive guide for network administrators, detailing the scope and objectives of the network management plan.
- 2. Scope:** This document covers all network devices, including routers, switches, firewalls, and servers, and applies to all network services provided by the organization.
- 3. Responsibilities:** The network administrator is responsible for ensuring the network is secure, reliable, and available to all users.

II. Network Overview

- 1. Network Architecture:** This section provides a detailed overview of the network topology, including all devices, connections, and services.
- 2. Key Components:** This section identifies the critical components of the network, such as core routers, edge routers, and servers, and describes their roles.
- 3. Security:** This section outlines the security measures in place to protect the network, including firewalls, intrusion detection, and encryption.

III. Roles & Responsibilities

A. Network Administrator

- 1. Monitor:** The network administrator is responsible for monitoring the network for any issues, including performance, security, and availability.
- 2. Troubleshoot:** The network administrator is responsible for troubleshooting any network issues, including connectivity, performance, and security.

B. Security Administrator

- 1. Policy Development:** The security administrator is responsible for developing and implementing network security policies, including access control, password management, and encryption.
- 2. Configuration:** The security administrator is responsible for configuring network devices to enforce security policies, including firewalls, intrusion detection, and encryption.
- 3. Monitoring:** The security administrator is responsible for monitoring the network for any security incidents, including unauthorized access, malware, and data breaches.
