# A Future Of Old Age

**Jon F. Nussbaum, Justine Coupland**

## **A Future Of Old Age:**

**Demographics, Old-Age Transfers and the Current Account** Mai Chi Dao, Callum Jones, 2018-12-07 Building on the evolving literature on the topic this paper reviews the relationship between demographics and long run capital flows in both theory and in the data For this purpose we develop a two region overlapping generations model where countries differ in their population growth and mortality risk Besides exploring the implications of demographics for saving and the current account over the long run we also study how these might be affected by differences in the coverage and sustainability of old age transfer schemes The model predicts that population structure and life expectancy which affects the need to save to meet old age consumption affect current account levels and that while countries with more generous unfunded transfer schemes tend to have lower saving and more capital inflows over the long run this effect may be dampened by natural limits on taxation of these schemes The key predictions of the model are generally supported by a rich panel dataset **Social**

**Protection for Dependency in Old Age** Jozef Pacolet, Ria Bouten, Katia Versieck, 2018-02-06 This title was first published in 2000 An up to date overview of the systems of social protection for the elderly in the fifteen EU states and Norway The book also offers a comprehensive comparative analysis of the residential semi residential and community services available and explores the debates surrounding policy reform of the social protection system of dependent older persons **Handbook of**

**Communication and Aging Research** Jon F. Nussbaum, Justine Coupland, 2004-04-12 This second edition of the Handbook of Communication and Aging Research captures the ever changing and expanding domain of aging research Since it was first recognized that there is more to social aging than demography gerontology has needed a communication perspective Like the first edition this handbook sets out to demonstrate that aging is not only an individual process but an interactive one The study of communication can lead to an understanding of what it means to grow old We may age physiologically and chronologically but our social aging how we behave as social actors toward others and even how we align ourselves with or come to understand the signs of difference or change as we age are phenomena achieved primarily through communication experiences Synthesizing the vast amount of research that has been published on communication and aging in numerous international outlets over the last three decades the book s contributors include scholars from North America and the United Kingdom who are active researchers in the perspectives covered in their particular chapter Many of the chapters work to deny earlier images of aging as involving normative decrement to provide a picture of aging as a process of development involving positive choices and providing new opportunities A recurring theme in many chapters is that of the heterogeneity of the group of people who are variously categorized as older aged elderly or over 65 The contributors review the literature analytically in a way that reveals not only current theoretical and methodological approaches to communication and aging research but also sets the future agenda This handbook will be of great interest to scholars and researchers in gerontology developmental psychology and communication and in this updated edition will continue to play a key role in the study of
