Note the marked contraction of mitochondria such as mitochondrion M, with increased density of the matrix and expansion of outer compartments. These contractile mitochondria in respiratory chain state II and III. Other mitochondria (M₂) are more unaffected in appearance with pale and perhaps contraction of the matrix material. Contents of the glycogen granules (GG) are identical. A microbody (Mb) also is seen (arrowhead of M₂ center).

Autoradiography John R.J. Baker, 2023-05-31 This book describes levels of autoradiography which is the localization within a solid specimen of a radiolabel to help the beginner or biologist choose the correct approach for particular application It attempts to lay emphasis on certain aspects of the appraisal of autoradiographs *International Review of Cytology* , 1972-04-28 *International Review of Cytology* *Micromethods in Molecular Biology* Volker Neuhoff, 2012-12-06 This book is based on practical experience and is therefore written as a practical manual The fore runners of the book were the manuals of the first and second EMBO Courses on Micromethods in Molecular Biology which were held in Göttingen in the spring of 1970 and the autumn of 1971 This book may serve as a manual not only for the participants of the third EMBO Course to be held in Göttingen in autumn 1973 but also for all experimenters who are interested in using micromethods It must be emphasized from the outset that this book is conceived as a cook book and not as a monograph which attempts to review the literature on micromethods critically The methods described here in detail are performed routinely in the authors laboratories and include all the practical details necessary for the successful application of the micromethods There are many other sensitive and excellent micro methods which are not included in this book because the authors feel that in a cook book only methods for which they have personal experience and proficiency should be described Some readers may feel that the title promises more than the present contents of this book however if sufficient interest is shown in this volume it may be possible to remedy such deficiencies in future editions **Autoradiography for Biologists** P Gahan, 2012-12-02 **Autoradiography for Biologists** discusses the basic and practical aspects of various autoradiography techniques It is composed of six chapters each chapter covers a specific form of autoradiography technique Chapter 1 discusses various theoretical aspects of autoradiography such as radioactive decay beta particle absorption photographic process sensitivity and resolving power Chapters 2 to 6 discuss basic aspects of several forms of autoradiography including macro stripping film diffusible substances liquid emulsion and high resolution autoradiography Practical and theoretical details of the technique together with modifications made are covered in each chapter This book will be both an encouragement and a help to people wanting to apply autoradiography to the solution of biological problems **Principles Of Radiopharmacology** Lelio G.
