Avoiding Armageddon Martin Schram, 2006-09 Since the end of the Cold War the threat of nuclear biological or chemical NBC attacks the weapons of mass destruction in today s headlines being unleashed against civilian populations has loomed ever larger A deadly combination of shortsighted mistakes by Western governments chaos in the former Soviet Union virulent international terrorism has succeeded in making us all far more vulnerable than many would like to admit Here is a guide to the worst possible threats to our individual national security from easily accessible uranium to smallpox to suicide bombers what we can do to save ourselves our country the planet Explains how why NBC warfare may be our next nightmare Companion to the 8 hour PBS series Illustrations *Avoiding Armageddon*, 2003 Discussion guide for the the four part PBS series from Ted Turner documentaries **Nuclear Weapons Proliferation in the Next Decade** Peter Lavoy, 2020-09-23

The intensification of the Iranian and North Korean nuclear crises has created new fears that deteriorating security conditions in the Middle East Northeast Asia and other regions will lead additional countries to seek their own nuclear arsenals in the years to come This special issue examines the factors that are likely to shape nuclear weapons proliferation over the next decade The internationally recognized authors of this issue many of whom are prominent scholars and others of whom have held influential governmental positions with responsibility for countering nuclear proliferation bring to light the conditions and events that might drive new countries to pursue nuclear weapons the indicators and cautionary signs that can provide early warning that a country is interested in building nuclear bombs and the policy and military measures that can be adopted to prevent or at least dissuade new proliferators The introductory chapter develops a novel analytical approach focusing on the role of nuclear myths and mythmakers and the subsequent chapters draw on this approach to help analysts better understand and policy makers better manage nuclear proliferation over the next ten years Japan's Nuclear Disarmament Policy and the U.S. Security Umbrella A. DiFilippo, 2006-10-02 This book explores the apparent contradictions behind Japan s stated goal of nuclear disarmament and its tacit acceptance of being protected by the U S nuclear umbrella

**Will Terrorists Go Nuclear?** Brian Michael Jenkins,2009-12-02 For more than 30 years Jenkins has been advising the military government and prestigious think tanks on the dangers of nuclear proliferation Now he goes beyond what the experts know to examine how terrorists themselves think about such weapons

Conflict, Security and the Reshaping of Society Alessandro Dal Lago,Salvatore Palidda,2010-07-13 A PDF version of this book is available for free in open access via [www.tandfebooks.com](http://www.tandfebooks.com) as well as the OAPEN Library platform [www.oapen.org](http://www.oapen.org) It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license and is part of the OAPEN UK research project This book is an examination of the effect of contemporary wars such as the War on Terror on civil life at a global level Contemporary literature on war is mainly devoted to recent changes in the theory and practice of warfare particular those in which terrorists or insurgents are involved for example the revolution in military affairs small wars and so on On the other hand today s research on security is focused among other themes on the effects of the war on terrorism and on civil liberties and social control This volume connects these two fields of research showing how war and security tend to exchange targets and forms of action as well as personnel for instance the spreading use of private contractors in wars and of military experts in the struggle for security in modern society This shows how contrary to Clausewitz s belief war should be conceived of as a continuation of politics by other means the opposite statement is also true that politics insofar as it concerns security can be defined as the continuation of war by other means This book will be of much interest to students of critical security studies war and conflict studies terrorism studies sociology and IR in general Salvatore Palidda is Professor of Sociology in the Faculty of Education at the University of Genoa Alessandro Dal Lago is Professor of Sociology of Culture and Communication at the University of Genoa

**Immigration, Integration, and Security** Ariane Chebel D'Appollonia,Simon Reich,2008-05-01 Recent acts of terrorism in Britain and Europe and the events of 9 11 in the United States have greatly influenced immigration security and integration policies in these countries Yet many of the current practices surrounding these issues were developed decades ago and are ill suited to the dynamics of today s global

economies and immigration patterns At the core of much policy debate is the inherent paradox whereby immigrant populations are frequently perceived as posing a potential security threat yet bolster economies by providing an inexpensive workforce Strict attention to border controls and immigration quotas has diverted focus away from perhaps the most significant dilemma the integration of existing immigrant groups Often restricted in their civil and political rights and targets of xenophobia racial profiling and discrimination immigrants are unable or unwilling to integrate into the population These factors breed distrust disenfranchisement and hatred factors that potentially engender radicalization and can even threaten internal security The contributors compare policies on these issues at three relational levels between individual EU nations and the U S between the EU and U S and among EU nations What emerges is a timely and critical examination of the variations and contradictions in policy at each level of interaction and how different agencies and different nations often work in opposition to each other with self defeating results While the contributors differ on courses of action they offer fresh perspectives some examining significant case studies and laying the groundwork for future debate on these crucial issues

*Media Review Digest* C Edward Wall,2005-08      **Forbidden Wars** Theodore Caplow,2007 *Forbidden Wars* proposes to explain why no nuclear weapon has been fired in anger since 1945 why no nuclear weapon has ever been detonated by accident why terrorists have made no serious attempt to acquire nuclear weapons and why the Cold War between the United States and the Soviet Union never broke out into a real war All of these remarkable non events flow from a set of unwritten but compelling rules for war making that appeared spontaneously after the atomic bombing of Hiroshima and Nagasaki along with a taboo against any further use of nuclear weapons which have so far been universally respected The most important effect of these rules is that every nation with a nuclear arsenal is virtually immune to attack by the armed forces of any other nation The same rules seem to explain the global spread of insurgencies and the successes and failures of the non proliferation regime These developments are not the result of a conventional understanding of nuclear deterrence but instead are based on the well documented history of armed conflict in the world during the past sixty years *Forbidden Wars* presents a unique insight that casts new light on America s foreign policy      **Enhancing the Livability of Asian**

**Mega-cities** Yue-man Yeung,2004      Atoms for Peace Joseph F. Pilat,2007-02-23 Publisher description      *Nuclear Nonproliferation* Phillip Margulies,2008 When Swedish chemist Alfred Nobel invented dynamite in 1867 he never could have predicted the unprecedented devastation that would occur as a result of his discovery History suggests that the existence of a weapon leads to its eventual use in war as illustrated by the dropping of the atomic bomb on the Japanese cities of Hiroshima and Nagasaki in 1945 At the opening of the atomic age scientists political analysts generals and politicians were haunted by the idea that nuclear wars could not be won both sides would be virtually destroyed The stakes of the game have only continued to rise as the club of nations currently possessing nuclear arms has become less and less exclusive the United States the Soviet Union Russia England France China Israel India Pakistan and North Korea Following a detailed analysis of

this timely issue Nuclear Nonproliferation explores the threat of nuclear production and the potential for solutions in four regions of the world the United States South Asia India and Pakistan the Middle East Israel Iraq and Iran and East Asia North Korea Tables graphs diagrams and helpful primary source documents complete this comprehensive volume
