**Avian Biology, 4** Donald Sankey Farner, **Avian Biology** Donald S. Farner, James R. King, 2013-09-25 Avian Biology is a collection of papers that deals with biological aspects of birds such as their classification and habitat behavior One paper reviews how birds are classified through practical systematics study of fossils and some of the problems encountered in the arrangement of major groups Another paper discusses the origin and evolution of birds from their reptilian predecessors to their current evolutionary rates Evolutionary rates vary depending on access to new habitats if the environment is static evolutionary rates can also slow down One author discusses the inter relations of sea birds with their marine environment including coastal areas and the biological properties of the surface water Another author describes the biology of desert birds relating to nomadism behavior and physical adaptations especially to the arid environment The author also describes the cooling mechanism of these desert birds Another paper evaluates the ecological aspect of behavior that includes foraging habitat selection mating and flocking cohesion Avian biologists zoologists and readers who have a general interest in birds will find this book useful *Avian Biology* Donald Sankey Farner, James Roger King, Kenneth C. Parkes, 1971 Vol III includes information on birds eyes and vision **Avian Biology** D.S. Farner, J.R. King, 1983 **Avian Biology** Donald S. Farner, James R. King, Kenneth C. Parkes, 2013-10-22 Avian Biology Volume VI is a compendium of papers that deals with selected aspects of avian biology One paper discusses the avian mating behavior and covers topics such as monogamy polygyny male incubation and female emancipation these papers also list a table of the species of birds in which polyandry has been observed Another paper examines bird migration in relation to the mechanism and development of migration with emphasis on the evolution and function ultimate causation of migration Another paper discusses the advantages of one form of social organization of birds during the non reproductive season over another form This paper reasons the possibility of the existence of a cost benefit social behavior Other papers discuss some physical features found in birds such as stomach oils and glycogen filled cells Another paper deals with the respiratory physiology of birds as new research data have been made available in this area This book can prove useful for investigators in avian biology zoologists and readers who have a general interest in birds *Avian Biology* Donald S. Farner, James R. King, 2013-09-17 Avian Biology Volume V is a collection of papers that deals with the biology of birds concerning their mechanics of flight and migration The first paper describes the mechanics of bird flights such as gliding soaring and the energy requirements of this activity Other papers investigate the control and metabolic physiology of migration including flight restlessness and fat metabolism Other topics cover migratory orientation research involving topographical meteorological inertial magnetic and celestial cues Upon migration to different environments birds have to adapt as their circadian and circannual rhythms are affected One paper discusses the works of Wynne Edwards Aschoff and Wever and Leopold and Eynon regarding their observations of bird migration cues One author describes the vocal behavior in birds including the dual sound theory where two sound sources can occur in each bronchus

Of interest to many in this paper is the description of the different stages in song development Other papers discuss the incubation behavior of birds as well as the energetics involved This book is suitable for zoologists bird enthusiasts and avian biologists **Avian Biology** Farner, Donald S., ed, King, James R., ed, Parkes, Kenneth, ed, 1971 *Avian Biology* Donald S. Farner, James R. King, 2013-09-17 Avian Biology Volume II is a collection of papers that deals with the biology of birds such as their integumentary and respiratory systems One paper describes the integument of birds that includes the skin feathers pterylosis skin muscles and other integumentary derivatives such as beaks comb claws and spurs The book explains the process of molting and the different generations of feathers such molting is dependent on the wear and tear of the plumage as well as hormonal changes One author compares the blood vascular system of birds and mammals and then gives a detailed description of avian hematology Other papers deal with the respiratory functions digestive system and the nutritional needs of birds Of interest is one author s description of the production of nutritive fluids holocrine which is secreted for the young This secreted fluid contains about 23 percent protein 10 percent fat and no sugar Unlike mammalian milk it also contains cells Another paper examines the intermediary metabolism of birds and the climatic effects on metabolism This book is suitable for bird enthusiasts zoologists and avian biologists **Current Ornithology Volume 17** Charles F.

Thompson, 2010-09-09 Current Ornithology publishes authoritative up to date scholarly reviews of topics selected from the full range of current research in avian biology Topics cover the spectrum from the molecular level of organization to population biology and community ecology The series seeks especially to review 1 fields in which an abundant recent literature will benefit from synthesis and organization or 2 newly emerging fields that are gaining recognition as the result of recent discoveries or shifts in perspective or 3 fields in which students of vertebrates may benefit from comparisons of birds with other classes All chapters are invited and authors are chosen for their leadership in the subjects under review

Farner, 2013 Avian Biology Volume VI is a compendium of papers that deals with selected aspects of avian biology One paper discusses the avian mating behavior and covers topics such as monogamy polygyny male incubation and female emancipation these papers also list a table of the species of birds in which polyandry has been observed Another paper examines bird migration in relation to the mechanism and development of migration with emphasis on the evolution and function ultimate causation of migration Another paper discusses the advantages of one form of social organization of birds during the no The Population Ecology and Conservation of Charadrius Plovers Mark A. Colwell, Susan M. Haig, 2019-04-26 The 40 or so species of beach loving plovers genus Charadrius comprise a diverse group of shorebirds found around the world Most of these species are challenged by changing climates and other human related development activities yet they provide key insights into basic ecological and evolutionary processes The expert international contributors take a comparative approach presenting examples from many worldwide plover studies and synthesizing the group s most pressing and important topics The book

further presents an emphasis on full life cycle biology including the importance of examining migratory connectivity issues even for non migratory plovers Color pages were planned and approved for some pages in this volume but due to a printing error some copies have incorrectly been released with these pages printed in black and white Replacement copies with the correct color in place can be obtained upon request by contacting orders crcpress com CRC Press extends apologies to any customers affected by this error and for the inconvenience caused Key Features Serves as a fundamental resource for conservation practitioners Detailed overview of a widely distributed group of shorebirds Authored by renowned specialists who present theoretical and applied perspectives Emphasis on comparative and synthetic approach in all chapters Related Titles McComb B et al Monitoring Animal Populations and Their Habitats A Practitioner s Guide ISBN 978 0 4291 3827 0 Garvey J E M R Whiles Trophic Ecology ISBN 978 1 4987 5846 8 Dewdney A K Stochastic Communities A Mathematical Theory of Biodiversity ISBN 978 1 1381 9702 2 **General Technical Report PSW.** ,1978 **Avian Biology** Donald S. Farner,James R. King,2013-09-03 Avian Biology Volume III is a collection of articles that deals with the biology of birds such as their peripheral endocrine glands and reproductive system One paper describes the avian reproductive system where physiological mechanisms that regulate gametogenesis get synchronized from stimuli in the environment thus ensuring that the young are born at the appropriate season Another paper correlates the morphology of the pituitary cells with the functions of the pituitary from physiological and chemical analyses A couple of papers describes the peripheral endocrine glands and the process of neuroendocrinology that includes detailed analyses of the neurosecretory system anatomy and the ependymal function in the median eminence composed of the anterior and posterior divisions One author describes the structure and refraction of avian vision as well as the probable determination of visual pigments in the eye cones through in situ microspectrophotometry The book then analyzes bird behavior through functional groups of bird activities Bird enthusiasts zoologists and avian biologists will find this book interesting and informative **Ecology and Conservation of the Marbled Murrelet** ,1995 Avian Biology Vol. III Farner D.
