Riley,2015-02-28 Foundations of Aviation Law is an easy reading general primer into the often complex world of aviation law written for aviation students as well as legal professionals who are looking for broad based introductory coverage of the subject The book is divided into six general categories with fifteen relevant sub chapters allowing focused learning into particular areas of law Throughout it features chapter summaries key word indices and review questions The design easily allows instructors to develop syllabi that spotlight the specific area of law that they are interested in exploring providing comprehensive coverage of both traditional introductory legal concepts and topical aviation subject matter **International Aviation Law** Ronald I. C. Bartsch AM,2024-10-16 This is the third edition of a now renowned guide that provides an extensive account of the state of the aviation industry and the law that regulates it This new edition revised and updated throughout focuses on environmental and sustainability considerations and includes a new chapter on innovations aimed towards meeting the 2050 Net Zero Emission targets endorsed by the International Civil Aviation Organisation ICAO and the International Air Transport Association IATA *International Aviation Law A Practical Guide* explains the international context and application of the law as it applies to commercial and recreational aviation and to the broader aviation environment It provides a comprehensive introduction to all aspects of aviation law from criminal law to contract law to the legal duties and responsibility of aircrew and other aviation personnel including airport operators air traffic controllers and aircraft engineers Each area of the law is clearly explained in accessible language and supported with practical case studies to illustrate the application of the law within an operational aviation context It also provides advice on how to avoid or minimize legal liability for those working in the aviation industry The book is written for a very broad readership of those working within the aviation industry those aspiring to work within it and those within the legal profession dealing with air transportation as well as students within the same industries The third edition will additionally find favour with new readers seeking information on environmental issues and answers to the question of how the aviation sector will meet the 2050 emission targets *The Law of Unmanned Aircraft Systems* Benjamyn I. Scott,2016-05-15 The worldwide expansion in the development and use of unmanned aircraft

systems UAS has rapidly spawned a patchwork of regulatory initiatives in the field. It is with the purpose of synthesising and clarifying this diverse body of international, regional and national law and of indicating trends and areas of concern that this extraordinary collection of expert essays has been compiled. The authors, working in many different parts of the world, are all in some way affiliated with the International Institute of Air and Space Law at Leiden University as either alumni, faculty members or students. With details of developments affecting countries in every continent, including Antarctica, the authors delve into the ways regulation of UAS is affected by such aviation law elements as the following: insurance, criminal and civil liability, role of international and supranational agencies, International Civil Aviation Organization (ICAO), European Union (EU), European Aviation Safety Agency (EASA), Association of Southeast Nations (ASEAN), privacy and cyber security, and civil UAS markets. Following detailed investigations of international and regional developments, the third section of the book covers a cross-section of national laws: Antarctica, Australia, Austria, Belgium, Brazil, Canada, Colombia, China, Cyprus, France, Germany, India, Indonesia, Italy, Japan, Mexico, The Netherlands, Portugal, Republic of Korea, Romania, Russian Federation, Slovenia, South Africa, Suriname, Switzerland, and Liechtenstein, Turkey, United Kingdom, and United States. The authors' approaches throughout are both introductory, allowing those unfamiliar with the field to gain valuable insight into this fascinating and dynamic area, and also critical and focused, so that those more involved in the legal dimension of aviation law can further their knowledge. Without a doubt, this work enriches the legal literature and encourages stakeholders in this burgeoning field of aviation law to further examine and challenge developments and trends in regulation and of practice. Lawyers, law firms, academics, governments, relevant governmental and non-governmental agencies, and strategic planners in the UAS industry will all welcome this ground-breaking resource.

International Aviation Law Ronald I. C. Bartsch AM, 2024-10-16. This is the third edition of a now renowned guide that provides an extensive account of the state of the aviation industry and the law that regulates it. This new edition, revised and updated throughout, focuses on environmental and sustainability considerations and includes a new chapter on innovations aimed towards meeting the 2050 Net Zero Emission targets endorsed by the International Civil Aviation Organisation (ICAO) and the International Air Transport Association (IATA). International Aviation Law: A Practical Guide explains the international context and application of the law as it applies to commercial and recreational aviation and to the broader aviation environment. It provides a comprehensive introduction to all aspects of aviation law, from criminal law to contract law, to the legal duties and responsibility of aircrew and other aviation personnel, including airport operators, air traffic controllers, and aircraft engineers. Each area of the law is clearly explained in accessible language and supported with practical case studies to illustrate the application of the law within an operational aviation context. It also provides advice on how to avoid or minimize legal liability for those working in the aviation industry. The book is written for a very broad readership of those working within the aviation industry, those aspiring to work within it, and those within the legal profession dealing with air transportation, as well as students within the same industries.
