*Awakening of Intelligence* Joy Kahn, Matt Kahn, Shima Ai, 2025-06-11      **Spiritual Intelligence and the Neuroplastic Brain** Charles W. Mark Ph. D., Charles W. Mark, 2010 Our brains are getting wired differently in the world of digital technology information revolution and in the inter cultural world of global society Think of the new vocabulary Global brain collective intelligence global village and cyberspace That should tell us something about the neural rewiring that is taking place inside of our brains whether or not we are aware of it The fact that the human brain changes throughout a person's life in response to intellectual stimulation physical exercise exposure to new cultural environments learning opportunities and challenges is a revolutionary discovery Till twenty years ago neuroscientists believed in the conventional theory that the brain's ability at making new neural connections stopped before a child entered adolescence That is the old dogma There is a Second Copernican Revolution taking place inside of our brains writes the author quoting Carl Zimmer Some experts are suggesting that we are already living in what Richard Restack calls the neurosociety Ray Kurzweil the futurist is predicting that by 2045 A D human beings will be living in an era of singularity when non biological machines invented by human brains and human ingenuity are going to outsmart human intelligence billions of times What is going to be the fate of the human spirit human spirituality the feeling of connection to a force and power that is greater than us God our ability to use spiritual imagination and our intelligence Are we progressively moving away from religion and community based spirituality into the spirituality of different strokes for different folks In his groundbreaking book *Spiritual Intelligence and The Neuroplastic Brain A Contextual Interpretation of Modern History* Charles W Mark takes the reader on a journey through modern history and shows the glimpse of what is to come <http://www.spiritualityintelligence.com>      *Report of Meeting ANZAAS* (Association), 1910      **Report of the ... Meeting ANZAAS** (Association), 1910      *The Collected Works of J. Krishnamurti (Vol-II)* Jiddu Krishnamurti, 2007-01-01 Until the end of his life at the age of ninety Krishnamurti the world teacher traveled the world speaking as a private person The rejection of all spiritual and psychological authority including his own is a fundamental theme A major concern is the social structure and how it conditions the individual The emphasis in his talks and

writings is on the psychological barriers that prevent clarity of perception Because his subject is all embracing the Collected Works which are in 18 Volumes are of compelling interest Within his talks in any one year Krishnamurti was not able to cover the whole range of his vision but broad amplifications of particular themes are found throughout these volumes In them he lays the foundations of many of the concepts he used in later years The Collected Works contain Krishnamurti s previously published talks discussions answers to specific questions and writings for the years 1933 through 1967 They are an authentic record of his teachings taken from transcripts of verbatim shorthand reports and tape recordings Jiddu Krishnamurti was born in 1895 of Brahmin Parents in South India At the age of fourteen he was proclaimed the coming World Teacher by Annie Besant then President of the Theosophical Society an international organization that emphasized the unity of world religions Mrs Besant adopted the boy and took him to England where he was educated and prepared for his coming role In 1911 a new worldwide organization was formed with Krishnamurti as its head solely to prepare its members for his advent as World Teacher In 1929 after many years of questioning himself and the destiny imposed upon him Krishnamurti disbanded this organization saying Truth is a pathless land and you cannot approach it by any path whatsoever by any religion by any sect Truth being limitless unconditioned unapproachable by any path whatsoever cannot be organized nor should any organization be formed to lead or to coerce people along any particular path My only concern is to set men absolutely unconditionally free Until the end of his life at the age of ninety Krishnamurti traveled the world speaking as a private person The rejection of all spiritual and psychological authority including his own is a fundamental theme A major concern is the social structure and how it conditions the individual The emphasis in his talks and writings is on the psychological barriers that prevent clarity of perception In the mirror of relationship each of us can come to understand the content of his own consciousness which is common to all humanity We can do this not analytically but directly in a manner Krishnamurti describes at length In observing this content we discover within ourselves the division of the observer and what is observed He points out that this division which prevents direct perception is the root of human conflict His central vision did not waver after 1929 but Krishnamurti strove for the rest of his life to make his language even more simple and clear There is a development in his exposition From year to year he used new terms and new approaches to his subject with different nuances Because his subject is all embracing the Collected Works are of compelling interest Within his talks in any one year Krishnamurti was not able to cover the whole range of his vision but broad amplifications of particular themes are found throughout these volumes In them he lays the foundations of many of the concepts he used in later years The Collected Works contain Krishnamurti s previously published talks discussions answers to specific questions and writings for the years 1933 through 1967 They are an authentic record of his teachings taken from transcripts of verbatim shorthand reports and tape recordings The Krishnamurti Foundation of America a California charitable trust has among its purposes the publication and distribution of Krishnamurti books videocassettes films and tape recordings The production of the Collected Works is one

**Intelligence** professor ibrahim elnoshokaty , Consciousness Genesis In Artificial Intelligence by Professor Ibrahim El  
Noshokaty I can provide a preliminary review that outlines the structure and content captured within the initial pages  
available to me Below is an overview based on the table of contents and some introductory text Title Consciousness Genesis  
In Artificial Intelligence Author Professor Ibrahim El Noshokaty Overview The academic work delves into the complex topic  
of artificial intelligence and its relation to human like consciousness It explores whether AI can be creative how numerical  
data and programming languages can emulate human sensory experiences and emotions and the potential implications of  
such advances Chapters and Themes Introduction and Fuzzy Logic System Initiates the discussion with fundamental  
questions about AI creativity and creation followed by the exposition of fuzzy logic systems Existential Threat and AI in  
Hollywood Examines AI s potential to disrupt industries such as Hollywood the feasibility of generative AI in original content  
production and copyright issues in AI outputs Hierarchical Fuzzy Deep Learning Discusses advanced AI techniques to  
enhance learning and decision making addressing the concepts of consciousness and fuzzy logic in AI Algorithms for Modern  
Fuzzy Logic Systems Delves into the technical aspects of fuzzy logic systems and algorithms highlighting methods for system  
optimization Development of Conscience in AI Contemplates the moral aspects and decision making capabilities of AI systems  
along with the incorporation of ethical considerations and human values Artificial Cognition Analyzes the notion of machine  
learning and cognition transparency within AI mechanisms and the ethical implications of artificial minds Artificial  
Sensations Explores the development of AI systems capable of mimicking human senses and responses using advanced  
materials and devices Artificial Brain Concludes with an investigation into mimicking human brain function within AI systems  
and the potential capacity for AI to evolve with environmental interaction The work appears to be an exploration of the  
frontier where technology meets human cognition emotion and ethical considerations The book may offer expertise in several  
domains including AI algorithms deep learning neuromorphic computing and the philosophical implications of imbuing AI  
with aspects of human consciousness The manuscript s purpose is likely to probe the theoretical boundaries of AI and its  
future potential as well as to identify and confront some of the ethical dilemmas that arise as AI systems become increasingly  
sophisticated This preliminary review only scratches the surface of what the book contains For a full review including critical  
analysis and conclusions it would be necessary to read the document in its entirety If you have any specific areas you d like  
me to focus on or if there are particular chapters you want to examine in more detail please let me know      *The Intelligence*
