Martín Ramírez,Jerzy Biziewski,2019-05-24 This book argues that security and defense have never been true priorities in the European Union and have constantly been marginalized by the elites since the Soviet Union collapsed and the Warsaw Pact disintegrated Despite the official rhetoric only a few tangible results can be presented concerning the operational readiness of European forces and the EU s inability to act was proven during the crises in the Balkans NATO has experienced similar problems as the majority of its members are EU countries Both organizations have declared their resolve concerning the security and defense of their nations and territories but unfortunately little has been done to lend these statements credence In this context the book analyzes several aspects of EU security and defense including the EU NATO

relationship common defense policy and strategy common capability building common understanding of strategic changes common operational planning and centrally synchronized exercises based on operational planning etc The member states have helped to make EU NATO effective organizations but unfortunately their individual interests and priorities constitute real challenges This aspect should be discussed and addressed by political and military elites scholars analysts students and the general public alike *The National Review, China ,1914*
