Concepts in Chemistry D. H. Rouvray, 1997-01-01 *Topological Indices and Related Descriptors in QSAR and QSPR*
James Devillers, Alexandru T Balaban, 2000-03-09 *Topological Indices and Related Descriptors in QSAR and QSPR* reviews the state of the art in this field and highlights the important advances in the generation of descriptors calculated directly from the structure of molecules This long awaited comprehensive book provides all the necessary information to calculate and use these descriptors for deriving structure activity and structure property relationships Written by leading experts in the field this book discusses the physicochemical significance strengths and weaknesses of these indices and presents numerous examples of applications This book will be a valuable reference for anyone involved in the use of QSAR and QSPR in the pharmaceutical applied chemical and environmental sciences It is also suitable for use as a supplementary textbook on related graduate level courses

De novo Molecular Design Gisbert Schneider, 2013-10-10 Systematically examining current methods and strategies this ready reference covers a wide range of molecular structures from organic chemical drugs to peptides Proteins and nucleic acids in line with emerging new drug classes derived from biomacromolecules A leader in the field and one of the pioneers of this young discipline has assembled here the most prominent experts from across the world to provide first hand knowledge While most of their methods and examples come from the area of pharmaceutical discovery and development the approaches are equally applicable for chemical probes and diagnostics pesticides and any other molecule designed to interact with a biological system Numerous images and screenshots illustrate the many examples and method descriptions With its broad and balanced coverage this will be the first stop resource not only for medicinal chemists biochemists and biotechnologists but equally for bioinformaticians and molecular designers for many years to come From the content Reaction driven de novo design Adaptive methods in molecular design Design of ligands against multitarget profiles Free energy methods in ligand design Fragment based de novo design Automated design of focused and target family oriented compound libraries Molecular de novo design by nature inspired computing 3D QSAR approaches to de novo drug design Bioisosteres in de novo design De novo design of peptides proteins and nucleic acid structures including RNA aptamers and many more

Modern Challenges and Approaches to Humanitarian Engineering
Koumpouros, Yiannis, Georgoulas, Angelos, Kremmyda, Georgia, 2022-03-25 The 21st century is associated with a number of environmental social and economic challenges spanning from globalization and migration to climate change global health urbanization and natural hazards These challenges of the modern age command our immediate reaction towards an equal society There is an urgent need for scientists researchers and politicians to take the reins by providing immediate solutions to tackle this harsh reality The need for a more human approach has recently led to what we call humanitarian engineering Modern Challenges and Approaches to Humanitarian Engineering provides relevant theoretical frameworks and the latest empirical research findings in this area It discusses the most recent challenges and approaches in the field of humanitarian

Contemporary Challenges in Education: Digitalization, Methodology, and Management Arinushkina, Anna A., Morozov, Alexander V., Robert, Irena V., 2023-10-26 In an era where digitalization is the driving force behind education an examination of how technology is reshaping pedagogy is mandatory for ensured success Shifting educational standards amidst the digital revolution must be evaluated with interdisciplinary approaches in computer science and engineering education

Contemporary Challenges in Education Digitalization Methodology and Management delves deep into the heart of contemporary education offering insights drawn from applied research and case studies all of which collectively redefine the very essence of education today It explores integrating socio economic modeling methods to optimize catering concepts in educational organizations At its core this book explores how applied research has generated transformations within national educational systems It dissects critical issues ranging from hot meal programs in schools to the nuanced demands of children with special educational needs The chapters of this reference book provide an indispensable resource for those seeking to navigate the digital terrain within education offering both a roadmap and a cautionary tale These insights prompt readers to ponder the immense impact applied research can wield on educational policies and practices making it an essential read for researchers policymakers and educators alike One of the book's standout sections dives deep into cross cultural communication and studies that transcend national borders and reveals the massive potential it has for reshaping the educational landscape Here readers are invited to contemplate how such studies can transcend the limitations of traditional educational paradigms fostering global educational cohesion in an increasingly interconnected world

Contemporary Challenges in Education Digitalization Methodology and Management addresses fundamental questions at the heart of educational advancement and underscores the pivotal role of applied research technology and cross cultural insights in shaping the future of education This book also peels back the layers of educational management examining decisions that optimize regional educational infrastructure enhance quality assessment and cultivate the professional competence of school principals It is an invaluable resource for educational leaders and administrators seeking to refine organizational structures and leadership within educational institutions Scholars educators policymakers and anyone interested in the educational landscape will find this book invaluable for navigating the complex challenges and opportunities in contemporary education

Engaging with Contemporary Challenges through Science Education Research Olivia Levrini, Giulia Tasquier, Tamer G. Amin, Laura Branchetti, Mariana Levin, 2021-09-24 This book starts with the premise that beauty can be an engine of transformation and authentic engagement in an increasingly complex world It presents an organized picture of highlights from the 13th European Science Education Research Association Conference

ESERA 2019 held in Bologna Italy The collection includes contributions that discuss contemporary issues such as climate change multiculturalism and the flourishing of new interdisciplinary areas of investigation including the application of cognitive neuroscience artificial intelligence and digital humanities to science education research It also highlights learners difficulties engaging with socio scientific issues in a digital and post truth era The volume demonstrates that deepening our understanding is the preferred way to address these challenges and that science education has a key role to play in this effort In particular the book advances the argument that the deep and novel character of these challenges requires a collective search for new narratives and languages an expanding knowledge base and new theoretical perspectives and methods of research The book provides a contemporary picture of science education research and looks to the theoretical and practical societal challenges of the future
