Parker,1996 **After the Demise of the Tradition** Kai Nielsen,2019-03-07 This ambitious book addresses the end of philosophy debate and the challenge it presents to contemporary philosophy both continental and analytic It is a chain of argument as well as a conversation conducted in the presence of the major contributors to that debate the critics especially Richard Rorty of the dominantly Platonic Cartesian Kantian tradition on the one hand and its defenders on the other Nielsen s account draws on Wittgenstein Quine Davidson Habermas and Foucault among others Nielsen takes Rorty s arguments seriously and insists that they demand a rethinking of the role of philosophy in a world in which the claims of relativism nihilism and historicism loom increasingly larger But unlike most who are impressed with the end of philosophy argument he provides an original and constructive response the development of a holistic antifoundationalist account of philosophy that utilizes a form of critical theory and wide reflective equilibrium in carving out a positive role for a new kind of philosophy This is an important book not just for philosophers but for social theorists for literary critics and indeed for scholars in any field in which the status of knowledge has become problematic *Organizational and Social Perspectives on Information Technology* Richard Baskerville,Jan Stage,Janice I. DeGross,2013-03-14 The articles in this book constitute the proceedings papers from the IFIP WG 8.2 Working Conference IS2000 The Social and Organizational Perspective on Research and Practice in Information Technology held June 1-10 2000 in Aalborg Denmark The focus of the conference and therefore this book is on the basic aim of the working group namely the investigation of the interrelationships among four major components information systems IS information technology IT organizations and society This basic social and

organizational perspective on research and practice in information technology may have evolved substantially since the founding of the group for example increasing the emphasis on IS development The plan for the conference was partially rooted in the early WG 8 2 traditions in which working conferences were substantially composed of invited papers For IS2000 roughly half of the paper presentations were planned to be invited the remaining half were planned to be double blind refereed in response to a Call For Papers Invited papers were single blind reviewed in order to provide the authors with pre publication feedback and comments along with the opportunity to revise their papers prior to its final incorporation in this book
