Golding,1979-10-01      **Combined Care of the Rheumatic Patient** H.A. Bird,P. LeGallez,J. Hill,2012-12-06 Gone are the days when the physician could act as God the orthopaedic surgeon as the Lord God and the nurses as ministering angels The concept of a team approach with each discipline supplying special yet overlapping skills is accepted in principle although not always in practice Physiotherapists and occupational therapists resist integration of their training among the hierarchy however on the ground these remedial therapists often do each other's jobs with remarkable amity Elsewhere I have discussed whether we need multipurpose professionals or multiprofessional persons Wright 1982 At Leeds the close collaboration that exists between rheumatologists and non medically qualified professionals has resulted in a productive Bioengineering Group for the Study of Human Joints a Clinical Pharmacology Unit of international renown and a Rehabilitation Unit that consistently produces bricks without straw One aspect of this combined approach to patient care has been the development of the discipline of clinical nurse metrology Bird et al 1980 Skilled nursing sisters have worked in this capacity for a decade in Leeds Their contribution has not only enhanced the reliability of the results of clinical trials in which they have been engaged but it has been highly successful and greatly appreciated by patients It has also measurably improved our patient education programme Moreover the posts have provided considerable job satisfaction This book arises from the expertise gained during these pioneer years      Problems in Arthritis and Rheumatism D.N. Golding,2012-12-06 This series of books is designed to help general practitioners So are other books What is unusual in this instance is their collective authorship they are written by specialists working at district general hospitals The writers derive their own experience from a range of cases less highly selected than those on which textbooks are traditionally based They are also in a good position to pick out topics which they see creating difficulties for the practitioners of their district whose personal capacities are familiar to them and to concentrate on contexts where mistakes are most likely to occur They are all well accustomed to working in consultation All the authors write from hospital experience and from the viewpoint of their specialty There are therefore matters important to family practice which should be sought not within this series but elsewhere Within the series much practical and useful advice is to be found with which the general practitioner can compare his existing performance and build in new ideas and improved techniques These books are attractively produced and I recommend them      *Current Catalog* National Library of Medicine (U.S.),1979 First multi year cumulation covers six years 1965-70      *A Synopsis of Rheumatic Diseases* Douglas Noel Golding,1982      *The Practitioner* ,1980      British Books in Print ,1986      British Medicine ,1979 Monthly Lists of new books pamphlets official publications brochures reports and journal articles in medicine and allied fields Also includes forthcoming congresses to be held in Britain and the Commonwealth No index      *Essential Medicine* John Lloyd Burton,1981      Surgical Disorders of the Shoulder
