Seeley,1996-11-11 This comprehensively rewritten updated and extended new edition of this established text focuses on what has become the most important single facet of the quantity surveyor s role cost management The scope of the book has been broadened to take account of the widening and more sophisticated cost management and control service that clients now

require The book examines the factors influencing building costs and how the precontract costs can be estimated analysed and controlled to ensure that buildings can be completed within the agreed budget and timescale and be of acceptable quality function effectively and provide value for money A new chapter on value management has been added together with an introductory chapter on cost modelling the chapter on life cycling costing is extended while the sections on energy conservation and occupancy costs are expanded Throughout the text many new case studies with supporting tables and diagrams are included in order to enhance the value of this book to the student and the practitioner

System Building and Aesthetic Preference Razak Basri,2011-08-03 Master s Thesis from the year 2007 in the subject Art Architecture History of Construction Robert Gordon University Aberdeen course MSc in Advanced Architectural Studies language English abstract This dissertation is concerned with the aesthetics of architecture using system building in housing in the UK It has been produced in response to a growing level of interest in the system building method and in the aesthetic value of housing schemes constructed using the system building method The aim here is to consider research on the system building methods within a house building context and test different types or categories of housing schemes based on aesthetic preference This study explores issues of perception and level of aesthetic value In general aesthetics is the study of the psychological responses to beauty and artistic experiences Aesthetics is the branch of philosophy which deals with the nature of art and of artistic judgment Some of the central questions of aesthetics focus on the beautiful under what circumstances it may be said to exist what criteria are to be used to judge the beautiful and whether or not these criteria apply equally to literature and music There are two traditional views concerning what constitutes aesthetic values The first finds beauty to be objective that is inherent in the entity itself The second position holds that beauty is subjective in that it depends on the attitude of the observer Immanuel Kant argued that judgments of taste as he called aesthetic judgments rest on feelings which though subjective have universal validity The instrumental theory of value an extension of subjectivism holds that the value of art consists in its capacity to produce an aesthetic experience Kristen L Zacharias System building leads to a faster completion period well organized site and better quality workmanship and most importantly offers major cost benefits for clients architects and builders Basri 2006 This also means that the construction method is simplified and standardised and ensures good communication between the parties involved Fergusson 1981 For the purpose of this study the concept of system building is to be understood in its widest possible context
